[IARU-R2-News 170] Special event stations WARD 2012 2012-03-21

On April 18, 2012 we will celebrate the World Amateur Radio Day on the 87th Anniversary of the founding of the International Amateur Radio Union, IARU.

This year's theme for the World Amateur Radio Day is "Amateur Radio Satellites: Celebrating 50 Years in Space" in remembrance the launching of OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962.

For this reason there will be several special event stations from IARU's Member Societies active on different dates during April: 6H6IARU, 3G73IARU and LZ1WARD.

If IARU's Member Societies plan to have a special event station for this reason in April let us now so we can publish the details before the end of this month. Send us an email to news@iaru-r2.org with the information.

Thanks all for you help. The web site is acting strange. This morning it appeared that the domain had expired and a few minutes later it was working fine. I have sent a message to the web master to check on it for me.

If you have access problems, contact me immediately and I can either fix it or send you the data files via email. One way or the other will will take care of you. Let me know if you have any problems at all.

Thanks

This is not DX info, but it does affect all of us.

Recently I received several hundred emails from a user that he did not send personally. His email address book was hijacked and used for purposes that the user was unaware of. He now has it fixed.

Here is a little tip that I use in my address book. It will not prevent my address book from being hacked, but it is unusable for sending out emails to my contacts.

Make the FIRST record in your contact list to read like this:
Contact Name: 1A

Email address: AAA@...

If a hacker tried to use my address book, the first address is INVALID and would shut down the process.

10824. Pirate Très urgent - Piracy - Very ur gent

Hi friends
PIRACY
On March 24 & 25 2012 a station appeared on the band signing TO4E, and sending as QTH Europa Island, AF 009.
Would you note that since the genuine TO4E dxpedition to Europa in 2003 no , but no activity has been authorized from this island, and of course there's no activity in this moment.
The block of prefix used in 2003 is no longer in use. ; For Europa since four years the block of prefix is FT5Exx and no licence has been issued to anyone.
The access to Europa is forbidden except under special authorisation.
As a reminder, Europa and the other islands of the Iles éparses are now under the authority of the French Austral and Antarctic Territories authority, which has in charge the following :
Terre Adélie : FT5Y
Crozet : FT5W
Amsterdam : FT5Z
Kerguelen : F5TX
Glorieuses : FT5G
Tromelin : FT5T
Europa : FT5E
Juan de Nova : FT5J,
The FR5/G, /T, /E, /J blocks of prefixes no longer exist ;
Didier, F5OGL, QSL manager of the TO5E 2003, EUROPA will not answer the cards for this so so activity in 2012.
Thanks to Didier, F5OGL for the information.

Bonjour à tous:
Depuis quelques jours, on signale une station TO4E qui émettrait depuis Europa (24 et 25 mars sur 20 et 15 mètres). C’est peut-être un pirate. En effet, cet indicatif (ainsi que TO4WW) a déjà été donné à une expédition que j’ai organisée en 2003 et nul ne peut désormais émettre avec ce call (du moins si l’administration tient ses fichiers à jour). Une erreur de l’agence des fréquences est toutefois possible mais serait surprenante….
De toute façon, une station qui émettrait depuis Europa ne pourrait le faire qu’avec le préfixe FT5E car, depuis 2007, ce sont les TAAF qui gèrent les indicatifs sur les îles Eparses comme dans le reste des terres australes et antarctiques françaises.
Pour mémoire :
Terre Adélie : FT5Y
Crozet : FT5W
Amsterdam : FT5Z
Kerguelen : F5TX

Glorieuses : FT5G
Tromelin : FT5T
Europa : FT5E
Juan de Nova : FT5J
Les blocs FR5/G, /T, /E, /J n’existent plus dans la législation française, ces terres n’étant plus gérées par la Préfecture de la Réunion.

Press Release #1
By N6PSE, Paul Ewing, The Intrepid-DX Group

The Intrepid-DX Group is pleased to announce our next DXpedition, as 6O3A from Hargeisa, Somaliland (Somalia) to take place from November 6^th -14^th , 2012. The Intrepid-DX Group is the same group which brought you the recent ET3AA, ST0R and YI9PSE DXpeditions.
Our primary objective is to activate Somaliland with a goal of providing as many DXers as possible a "new one" with this rare DXCC entity and, as a secondary objective, to give as many band-slots as possible. We will focus on North America, KH6, ZL/VK during those periods when propagation is possible to those areas.

The team consists of twelve operators including: Co-Leader Paul Ewing-N6PSE, Co-Leader David Collingham-K3LP, Dave Flack-AH6HY, Jun Tanaka-JH4RHF, Dmitri Zhikharev-RA9USU, Darko Rusman-E70A, Krassy Petkov-K1LZ, Hrane Milosevic-YT1AD, Bill Beyer-N2WB, John Miller-K6MM, Al Hernandez-K3VN and Bob Grimmick-N6OX.
Our QSL Manager is Joe-W3HNK. We will have OQRS, we will accept direct and bureau QSL cards. We plan to upload our logs to Club Log on a daily basis.
You can find out more about our plans at our website:

PIRACY
On March 24 & 25 2012 a station appeared on the band signing TO4E, and sending as QTH Europa Island, AF 009.
Would you note that since the genuine TO4E dxpedition to Europa in 2003 no , but no activity has been authorized from this island, and of course there's no activity in this moment.
The block of prefix used in 2003 is no longer in use. ; For Europa since four years the block of prefix is FT5Exx and no licence has been issued to anyone.
The access to Europa is forbidden except under special authorisation.
As a reminder, Europa and the other islands of the Iles éparses are now under the authority of the French Austral and Antarctic Territories authority, which has in charge the following: Terre Adélie: FT5Y, Crozet: FT5W, Amsterdam: FT5Z, Kerguelen: F5TX, Glorieuses: FT5G, Tromelin: FT5T, Europa: FT5E and Juan de Nova: FT5J.
The FR5/G, /T, /E, /J blocks of prefixes no longer exist;
Didier, F5OGL, QSL manager of the TO5E 2003, EUROPA will not answer the cards for this so so activity in 2012.

Luxembourg Issues Stamp to Celebrate 75 Years of Amateur Radio -
Founded in 1937, the Réseau Luxembourgeois des Amateurs d'Ondes Courtes (RL) -- that country's IARU Member-Society -- is celebrating its 75th anniversary. In honor of this milestone, Luxembourg's Entreprise des Postes et Télécommunications (P&TLuxembourg) has issued a .60 Euro postage stamp (about 80 cents in US dollars); P&TLuxembourg is that country's government owned corporation for mail and telecommunications. This is one of three commemorative stamps issued by Luxembourg in 2012. [ARRL]

NTIA: No Objection to Additional Data Modes on 60 Meters:
In response to requests for clarification from the ARRL, the National Telecommunications and Information Administration (NTIA) has confirmed that it has no objection to the use of a broader range of data emissions by amateurs on the five 5 MHz frequencies on 60 meters. ARRL's original understanding was that the NTIA preferred that the use of 2K80J2D emission be limited to Pactor III.

The NTIA now says that that is not the case.
In an e-mail response to ARRL Chief Executive Officer David Sumner, K1ZZ,
Karl Nebbia, Associate Administrator of the NTIA Office of Spectrum Management,
stated, "NTIA has no interest in limiting the types of emission used by the
amateurs as long as the data emission does not exceed the 2.8 kHz bandwidth
generated by the upper sideband transmitter." Nebbia referred all further
inquiries to the FCC, which "...sets the conditions for use of the five 5 MHz
frequencies by the amateurs."
The requirement of only one signal per channel remains, as well as the
prohibition against automatic operation. The FCC continues to require that all
digital transmissions be centered on the channel-center frequencies, which the
Report and Order defines as being 1.5 kHz above the suppressed carrier frequency
of a transceiver operated in the Upper Sideband (USB) mode. This is typically
the frequency shown on the frequency display.
Channel USB Suppressed Carrier (kHz) Center (kHz)
1 5330.5 5332.0
2 5346.5 5348.0
3 5357.0 5358.5
4 5371.5 5373.0
5 5403.5 5405.0
The ARRL advises amateurs to operate with care when using digital modes in
consideration of the fact that hams are secondary users on these frequencies.
See the revised 60-Meter FAQ page on the ARRL Web at,

Bahamas round trip by I2VGW. Gabriele has already in his hands licence and callsign, so he plans to be operating as C6AGW starting April 26th through May 6th from New Providence main island (NA 001), Bimini islands, (NA048) and Berry islands (NA054) two quite rare and claimed Iota references. And, what’s more, before come back to Italy, from Long island (NA-001). So, copy and listen carefully to catch the right reference and location.

Please keep in
mind that, this time, it will be a very holiday style operation
(with his first mate and supporter that is his wife Roberta).

In any case, as usual, Gabriele will give great emphasis to digital modes and Warc bands but SSB too.

C6 AGW set up will be a new dipole to test, Icom 7200, vertical HF3 and a Buddipole

For further informations now and any update, during the I2VGW's trip, please have a look at his dxpedition web site :http://www.mdxc.org/c6agw

DX UNIVERSITY ---> The first session of DX University (DXU) will be held on 20 April at the Holiday Inn in Visalia, California [425DXN 1086]. "Over 120 'Students' have already reserved their place so we have increased the room-size. Instead of shutting out late-comers, everyone is now welcome to book their seat at this ground-breaking event, the first of its kind. But pre-registration is required and there's only three weeks to go!" Reservations can be made at www.dxuniversity.com. Please contact Wayne, N7NG (n7ng[@]bresnan.net) or Roger, G3SXW (g3sxw[@]btinternet.com) with any queries. [TNX G3SXW]

LOTW & CQ AWARDS ---> The announced target date for beginning LoTW support for the CQ WPX Award (1 April 2012) [425DXN 1082] is being pushed back to mid-April. This delay has been made necessary by the ARRL's "decision to launch its new DXCC fee structure on April 2 and online DXCC applications on April 3. There have been no reported technical problems with the software needed to use LoTW for WPX, and beta testing of the system is planned for early April. Additional CQ awards will be added later, one at a time". Further updates will be provided when more information is available. [TNX CQ Newsroom]

PIRATE ---> The station signing TO4E "from Europa Island" over the past weekend was - of course - a pirate. The genuine TO4E operation dates back to 2003, and it was the last duly authorized activity from Europa. Should any legal operation took place nowadays, it would be under the FT5E prefix block.

PY0S ---> Cesar, PY2YP is collecting the logs for past operations from St. Peter and St. Paul Rocks. He uploads them to LoTW and to the log search on the dedicated page at www.py2yp.com. So far Cesar has added ZY0SW, ZY0SS & ZY0SY (May 1989); ZY0SK & ZY0SP (February 1994); ZY0SK & ZY0SG (February 1997); PS0S (August 2000).

UK POSTAL RATES ---> Postal rates in the United Kingdom will increase on 30 April. The new rates for standard airmail letters will be as follows:

	Europe	Rest of the world
up to 10 grams	GBP 0.87	GBP 0.87
up to 20 grams	GBP 0.87	GBP 1.28

A Price Finder on-line tool is provided by Royal Mail (www.royalmail.com)

+ SILENT KEYS + CQ Contest Hall of Famer John H. Thompson (W1BIH/PJ9JT) passed away on 8 March at 97 years of age. He was a contester and DXer for over 70 years, competing - and often winning - from either his home QTH or in Curacao.
Also Edward R. Hawkins (K6ZO) became a Silent Key on 8 March. He was 96 years old, and had an amazing total of 394 DXCC Entities confirmed.
Other recently reported Silent Keys include Marcel Pouchoux (F9MD), Charles V. Kelley (HS0ZCX/W3IAO), Paolo Eduardo Junqueira de Moraes (PY2ZZ) and Victor V. Filippov (RU0ZX).

BRITISH VIRGIN ISLANDS DXPEDITION: VP2V on 6 METERS Only.
W9DR, Dave, will be operating from the British Virgin Islands (NA-023, Grid Loc. FK78) on 6 metres between 21 June and 2 July, 2012. The call will be VP2V/W9DR and he will be on 50.115.6 Mhz CW and 50.115 Mhz SSB. Please submit conformation request (QSL) to W9DR's home address (QRZ.com). [MMMonVHF]

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012
Well, I wanted to provide as much advance time as I could so you could mark your calendars and/or get everything in your 6m station optimized by the end of August As those of you know who completed JT65A mode contacts with me on 6m EME when I was in E51, 3D2 and 5W, I will do my best to set up and be active during our common moon windows - especially during the optimum days of the month for 6m EME. The callsign is not in hand yet (but assured by email), and the QTH has not been finalized, but all the plane tickets have been purchased (as usual, any contributions are VERY welcome), and the equipment (a KX3 portable transceiver with compatible 6m amplifier) is in the works. As soon as the license is in hand, the information will also be available under the callsign on QRZ.com. In the meantime, preliminary information about the DXpedition is here:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
I don't know if it will be possible to find a QTH that provides my usual preference for a takeoff shot over water on moonrise. However, that is not

necessary to work NA stations during their moonsets (I will be elevating), so we will get the ground gain on YOUR end for that And if a QTH with a good moonrise shot (for EU moonset) cannot be found, it is quite likely that we will instead wind up with a good moonset over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period, as we did together from E51 and 3D2; Bob's call will probably be his old callsign of ZK2RS. More details will be posted on the above website as the departure time at the end of August gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73, Lance. [MMMonVHF]

2012 edition of the Marathon 50
Hello all, less than a month he began the 2012 edition of the Marathon 50 MHz I wanted to point you all the news inserted in this edition. As part of the trial of the new frequency of 70 MHz has been entered for this category only with the band to collect as much data (QSO) in order to provide an important statistical basis for the University of L'Aquila, the promoter of the trial. For this purpose has been added at the site of the log on-line with the procedure for the management of that category.
I hope to receive your requests for participation to the race of the 2012 Marathon, as shown on the site, and those who wish to participate in the category 70 Mhz should indicate in the request for access to online log including information on working conditions for such frequency.
Thanking you in advance for your attention I wish you a Happy Easter to you and your family.

GI, NORTHERN IRELAND
Additional Titanic Centenery Information:
Two special specials will be active from Belfast for the 100th anniversary of the sinking of the RMS Titanic. GI100MGY will be active from The City Hall, Belfast 7-10th of April as part of the councils Titanic 2012 festival. We'll actually be setting up station in the council chambers.
GI2012MGY will then run from 12-18th from onboard the SS Nomadic, the last surviving link to the Titanic and the White Star line:
www.nomadicpreservationsociety.co.uk/index.asp
We'll be operating mere yards from where the Titanic and indeed the Nomadic where built AND where MTV will be staging their Titanic Sounds concert on the 13th.
The two callsigns are "firsts" for the UK being the first time a regional designator has been allowed to be used as a special event callsign, we expect interest to be huge. GI100MGY will of necessity be a 100w station while GI2010MGY will run the legal limit. We'll be QRV on all bands 80 - 10m using CW and SSB, it is unlikely we'll do any digital modes as operating time is short and we want to give as many as possible a chance to work us.
See QRZ.com for details [Pete at the DX-Newsdesk]

RAC Bulletin 2012-021E - Update on 60 Metres
2012-04-04

RAC has been pursuing channelized access to 60M since early 2010. Our request was for an allocation identical to the US allocation, with one additional unique Canadian channel, and with fewer restrictions (the US allocations were restricted to USB voice only, with power and antenna restrictions). Amateurs will recall that one of the rationales for RAC requesting a 60M allocation was to enhance emergency communications including cross-border interoperability. IC responded by indicating that they were prepared to support access in synch with US amateur allocation and regulations. In late 2011, in response to an ARRL petition for change, the FCC issued a final Report and Order that, once it has been published in the Federal Register, will result in a change to the frequency of one of the channels and will enable the use of CW and data modes in addition to USB voice. These features had already been in the original RAC request. The FCC Report and Order has cleared the way for Canada to move ahead with finalizing its allocation to match the new US allocations, including the ability to use CW and data modes. This allocation, which will be on a secondary basis, requires a public consultation through the Canada Gazette, which RAC anticipates will occur in the second quarter of 2012.

It is important that Canadian Amateurs comment on the draft once released. RAC will continue to keep our members aware of the status of this important initiative.

An important offer has been made by IC with regards to 60M. Industry Canada is prepared to licence operators in channelized 60M operation pending the results of the consultation process. The licencing process will be managed out of ICs regional offices and is open to any Canadian amateur. The process requires a formal licence application, payment of a licence fee, and the use of a special call sign instead of the licensee's amateur call sign. RAC regards this as an important interim step allowing amateurs to get on the air in the 60M band as soon as possible and thanks IC for this initiative. RAC`s objective, however, is to ensure that Canadian amateurs have the 60M allocation available to all amateurs as part of their amateur radio certification, i.e. without licence applications, licence fees or special call signs. RAC is cautiously optimistic that this will come about in the summer of 2012.

If you wish to obtain a temporary, paid license to operate on 60M, please contact your local Industry Canada Regional Office to complete the application form.The total fee depends upon the date of your application but in any case is less than $100.

AS-109 ---> The RT9K/p expedition to Zhuravlinyy Island (AS-109) [425DXN
1091] has been cancelled. The ice is at the same time too thin for the team
to use their snowmobiles, and still too thick for a boat to reach the
island. [TNX DX World]

HK0NA QSL UPDATE ---> The cards have been designed, the order has gone to
the printer and the HK0NA QSL card processing should start sometime in
May-June. "This will be an enormous enterprise and will take time to
process", N2OO says. "QSL cards will not be mailed all at one time. We are
pre-processing direct OQRS requests first. Direct mail will be next".
Updates will be posted to www.sjdxa.org/hk0na.htm

HOLYLAND CONTEST ---> This year's event (the 21st edition) will be held on
20-21 April, from 21 UTC to 21 UTC. Complete rules can be found on the
Israel Amateur Radio Club's website (www.iarc.org).

PY0S ---> Cesar, PY2YP reports he has uploaded a few more St. Peter and St.
Paul Rocks logs to LoTW and to the log search on the dedicated page at
www.py2yp.com [425DXN 1091]: PW0S (February 2001), ZY0SAT (March-April
2001, satellite QSO still pending), ZY0SAT (February-March 2002), ZW0S
(April, September and December 2003) and PY0S/PS7JN (November-December
2004, September 2005, January-February 2006). He is now working on paper
logs for PY0SJ, PY0SP, PY0ZSA, PY0ZSB & PY0ZSC (September-October 1982) and
PY0SK & PY0SR (May 1991). Cesar is also trying to get the logs for 1978 and

1987.

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Erminio Pandocchi I2EOW (i2eow[@]fastwebnet.it).

+ SILENT KEY + Fred Maia (W5YI), a leading Amateur Radio journalist for nearly 35 years and a pioneer of the volunteer examining programme adopted by the FCC in 1984, passed away on 28 March at 76 years of age. In 1986 he founded The W5YI Group to develop, publish and sell amateur and commercial radio license study materials.

Press Release
HK0NA QSL update
April 11, 2012

The HK0NA QSL design has been completed and they are in the process of being
printed. We expect delivery by the end of April.

Our QSL Manager N2OO is posting QSL processing updates online at
www.sjdxa.org/hk0na.htm. Watch this link for QSL updates.

Please understand that this QSL operation will take time to process. Please
be patient. It is anticipated that cards should START to go out in the May-June
timeframe.

Cards will NOT be mailed all at once. They will be going out slowly as they
are processed.

A sample of the HK0NA QSL card be seen on our website (www.hk0na.com).
We wish to thank Stan SQ8X for the beautiful design work and Everett WZ8P of
Franklin Printing for offering printing services.

Remember that the fastest and most popular way to get your HK0NA QSL is to
the use the Online Qsl Request System (OQRS).

The HK0NA team hopes you enjoy the beautiful card. A lot of effort went into
its design!

10852. Toni, OH2UA at Controls of Remote CQ8X in Azores

PRESS RELEASE FROM THE DESK OF RADIO ARCALA

Martti Laine, OH2BH

March, 14, 2012

Toni, OH2UA at Controls of Remote CQ8X in Azores

Wow, what a weekend it was! Radio Arcala's engineers allowed a first serious
remote contest operation - over the internet - from the CR2X station located
4500 kilometers away from the actual operating position. It was a gas
running those endless U.S. pileups from the Azores while gazing at the
Northern Lights through the window at home 65 degrees north. It presented a
new challenge, following the words of Hamlet - to be or not to be (there)?

With ever increasing antenna restrictions and noisier environments, going
remote is the most likely way for serious folks to utilize the current
technology for the common good. Radio Arcala is in the forefront of pushing
for IP address driven station building blocks, such as radios and amps,
while our vision is that each station accessory will soon have its own IP
facility.

Running the highest continental number of QSOs (4543) in a first serious
effort at remote operation shows the potential of the remote concept. There
is still room for improvement and, honestly, it has to be said that the
world is not ready - but we are one step closer.

Radio Arcala welcomes the approach taken by CQ Magazine's and ARRL's Contest
administration in blessing our future by allowing remote operations in
contesting under existing rules.

These QSOs do not count for DXCC but they do count for the true spirit of
Amateur Radio, being in the vanguard of state-of-the-art technology and its
applications.

Radio Arcala, OH8X, is a team of serious hams dedicating their efforts to
interesting and novel areas of amateur radio. They push the issues to
extreme, and their contest team, "Arcala Xtremes, is used as their test
lab to verify the results. Arcala labs are located at 65 degrees north in
the village of Arcala, Finland. www.radioarcala.com

DXCC Card Checking Rule Change-

This is to provide notice of an upcoming change in an administrative procedure contained in the DXCC Rules.

Prior to its scheduled teleconference last week the Programs and Services Committee received a recommendation from MVP Manager Dave Patton, NN1N, for a change in the DXCC Rules to permit volunteer Card Checkers who have achieved DXCC on 160 meters to check 160 meter QSLs in the field, and all Card Checkers to check cards for Deleted Entities.

Until now there has been a requirement that 160 meter cards be checked by Headquarters staff. The main issue has been that some cards for 18 MHz QSOs can be altered to show 1.8 MHz without the alteration being detected. Therefore, the time of the QSO becomes significant.

Some cards for Deleted Entities date back to 1960 and before, and sometimes it is difficult in the field to determine what entity the card ought to count for. Deleted Entities do not count for the DXCC Challenge or for the Honor Roll but do count toward all-time totals.

After discussion during the teleconference the PSC unanimously voted to authorize staff to amend the DXCC rules as proposed but with no change in how Card Checkers are appointed.

Sec IV Rule 1) a) is the specific rule that will be changed:

Old rule:

1) Entities Eligible for Field Checking:

a) All current entities dating back to November 15, 1945 can be checked. Cards for deleted entities and cards indicating 160 meters must be submitted to ARRL HQ.

New rule:

1) Entities Eligible for Field Checking:

a) All entities dating back to November 15, 1945 can be checked as follows:

i) Cards for deleted entities may be checked by all DXCC Card Checkers.

ii) If the DXCC Card Checker cannot determine the entity of a QSL for a QSO with a deleted entity, the Card Checker may photograph both sides of the card and email those images to the DXCC desk for final entity determination. The Card Checker must certify on the application

that those images are made by him/her and are a true representation of the card. HQ will assign the final entity name as determined, to the applicant’s DXCC.

iii) Cards for 160 meters may be checked by DXCC Card Checkers who have themselves earned DXCC on 160 meters. Those Card Checkers who do not have 160 meter DXCC, may not check cards for QSOs on 160 Meters.

iv) All other bands (other than 160), modes, and all entities may be checked by all DXCC Card Checkers.

Benefits of these changes include: Further improvement in member/customer service at headquarters; improvement in applicants’ experience with DXCC participation; improvement in QSO-validity review by allowing experienced DXers who are Card Checkers to review the 160 meter data; enhancement of the use and value of the new Online DXCC web tool.

21/05/2012: Andre, GM3VLB, reports "In the hope of completing what I now call the "SCOTIA challenge", which in my own case means activating the last five of the programme's 200 islands which I haven't yet activated, I am returning to the Orkney (EU-009) group, beginning 21 May, 2012. I have a return booking on 7 June but am prepared to remain in EU-009 longer, if necessary. The 5 remaining islands are Muckle Green Holm (IOSA OR32, SCOTIA OI20), Linga Holm (IOSA OR31, SCOTIA OI21), Eynhallow (IOSA OR24, SCOTIA OI24), Faray (IOSA OR23, SCOTIA OI28) and Calf of Eday (IOSA OR29, SCOTIA OI29). Some are quite difficult to approach and to land on (steep rocky shores) as well as being subject to very strong tidal current (the waters off Eday are in fact the chosen location for testing the latest tidal generators, so near-perfect weather conditions will be required. I believe most may be first-time activations. This will be a solo operation (XYL Veronica having decided discretion was the better part of valour!). If successful, I hope to continue activating islands, this season, in a more relaxed way, hopefully teaming up with regular island buddy Alex G(M)0DHZ to re-activate some less remote islands, which even some of the high-scoring SCOTIA chasers may have missed - I will be doing an analysis of the records to determine the most wanted." QSL via home call, direct only. [DE0MST]

C6AGW - PRESS RELEASE 2 - TESTING IN THE RAIN
During the week-end, under the Italian rains (cats and dogs raining, hi)

Gabriele, I2VGW has tested all the antennas and the equipments for his Bahamas round trip. As announced he plans to be operating as C6AGW starting April 26th through May 6th from the Bimini islands, NA-048 and/or Berry islands (NA-054) quite rare IOTA references and, of course, also from New Providence and Long Island, Great Bahama Bank (NA-001). UGANDA:

From the beginning of May until June 2012, (exact end of stay not known yet) Freddy, I, Freddy/F5IRO have got a job assignment in Uganda .
Arrived I will set my K3 and DIY antennas, probably verticals or dipoles, space permitting at the location.
Some contacts has been done with David 5X1D (KH9AE) who is helping me to get a ticket for the first week of May.
CW on the upper HF bands, especially on 10 MHz in the evening (5X = GMT + 3) and a may be very little PSK,
Stay tuned and watch the clusters.
The QSL route is still via my friend Michel, F8DFP, via the French bureau or direct with SAE&IRC;
See you down my log.
73, FREDDY, F5IRO , 5X1??

Bonjour à tous
Reçu de Freddy, F5IRO
Bonne chance à tous

OUGANDA
A compter de début Mai jusqu'en Juin, je serai en Ouganda.
Pour ce déplacement non touristique, j'emporte quand même une station radio HF pour trafiquer un peu.
J'ai pu entrer en contact avec 5X1D (KH9AE) David qui réside dans ce pays depuis de nombreuses années, il devrait m'apporter son aide pour obtenir la licence, que je pense avoir dans la semaine de mon arrivée.
La station sera constituée juste de l'Elecraft K3. Je fabriquerai une antenne sur place, verticale probablement ou dipôles si l'espace est assez grand. Trafic exclusivement en CW sur bandes hautes et 10 mHz le soir (Ouganda = GMT + 3).
Il se peut que j'apparaisse aussi en PSK
La carte QSL sera à envoyer via bureau à mon manager, Michel F8DFP ou en direct à son adresse personnelle moyennant un IRC et enveloppe.

10867. French Hams in Thaïland

Hi friends

Since 2006, our friend Alain, F6HBR is living in Thaïland.

After seven years of negotiation between France and Thaïland, a reciprocal agreement has been signed in last december 2011.

So , to day, for the first time, a French operator has got a Thaï ham ticket.

Starting on thursday April 25th, Alain, F6HBR, (ex FO8FW & FR5EM) is now HS0ZKG.

Alain will traffic mainly in CW and a little PSK and RTTY, from Koh Samui (AS-101).

More information to follow .

A second French ham is leaving in Thaïlandals, Gerald, F8DEG. He going is to be the second French ham signing HS0Zxx.

Bonjour à toutes et à tous,

Il a fallu attendre 7 ans, sept longues années de négociations parfois décourageantes, pour voir enfin signé, le 1er décembre 2011, l'accord de réciprocité entre la Thaïlande et la France.
Ensuite il a fallu attendre encore presque 5 mois pour que la 1ère licence soit délivrée à un OM français dans le cadre de cet accord.
Ceci a été fait aujourd'hui, et F6HBR est devenu HS0ZKG !

Un grand merci à tous ceux qui nous ont soutenus et encouragés, je ne peux citer tout le monde, cependant je tiens à remercier particulièrement Gérald, F8DEG, qui m'a aidé et accompagné dans ces démarches, et devrait être le prochain sur la liste.

J'espère vous contacter bientôt .... en CW (et aussi un peu en PSK ou RTTY) !

Plis d'informations à suivre

Alain BRUGNON, F6HBR, FO8FW, FR5EM et maintenant HS0ZKG
depuis KOH SAMUI (iota AS-101)
membre de l'UFT Numéro : 101, et CDXC numéro 545

Daniel ZS6JR and my self ZS6DJD will be operating from Mozambique for
Seven to ten days starting on the 3th or 4th of may 2012 depending how
quick we get the equipment up.
The idea was to park next to a small lake in Shai Shai Mozambique 400
km north of the capital and operate all
vertical antennas with the earth wires in the water and see what we
could do .
So we will operate vertical on most bands 40m to 10m, but Daniel has
also decided to take a Hex beam antenna with.
If we get the chance we will also work 6m and 80m.
I do not have a call sign as yet.
This we will only get soon .
I will most probably get C91JD Or C91DJ or C91DN.
Conditions allowing we should be on all these bands. on 20m around
14.200, 14.1950, 02 14.900 or 14.2100 on 15m at 28.2800 or 21.2750,
21.2700 21.650, 21.500.
On Ten Meters at 28.450 or 28.470 or 28.500 and others bands 17m and 12m.

Would you be so kind as to tell as many Amateurs as possible.
Thank you very much and all the best .
73 and 88.

Yours in the Amateur Radio Hobby

Hi Tony, yes it is. It went down last evening and thus far I have not gotten in touch with the web master. He may be at a Hamfest somewhere. I will continue to try and get him and get it restarted. You may have to drive over to Miami and talk to him for me, haha.

Thanks for the note pal.

The 7O6T Yemen DXpedition began at 2100 UTC Monday, April 30 and will continue *through 2100 UTC May 15*. Yemen currently sits at #5 on /DX Magazine/'s most wanted list, behind North Korea, Navassa, Bouvet and Heard Island. The ARRL DXCC Desk will review the 7O6T DXpedition's documentation before granting approval for the operation to count for DXCC credit.

The DXpedition will be on Socotra Island -- the largest island in the four-island Socotra archipelago located in the Indian Ocean -- about 353 kilometers south of the Yemen mainland. Socotra Island (AF-028) is also ranked #1 on the RSGB's Islands on the Air (IOTA) list, with only .3 percent of IOTA participants claiming it. Socotra also counts for one of the three Diamond DXCC Entities that make up today's Yemen (including Aden City and Yemen itself) from the 1937 DXCC List.

6 METRES & UP -

- METEORS IN MAY -
The most prominent shower this month is n - Aquariids, peaking May 05, 19h
UT.
This shower, related to the rich stream associated with comet 1P/Halley, is
characterized by a broad maximum, sometimes with a variable number of submaxima.
Recent IMO analyses, based on data collected between 1984 and 2001, indicate
that ZHR is generally above 30 hr-1 between about may 3-10. The peak rates
appear to be variable on a roughly 12-years timescale, due to influence of
Jupiter. According to this model, the most recent highest rates should have
happended around 2008-2010. Peak ZHR around 65 hr-1 is predicted for 2012.
Please note that n - Aquariids radiant is above horizon (thus making the shower
usable for MS) in Europe only (approximatively) in very late night and morning
hours. While southern Europe stations will be able to "see" the radiant till
early afternoon, in northern Europe skies the radiant culminates at reletively
low elevation so an observer is able to see the radiant for much less time. Some
daytime showers (? - Cetids, peaking May 20th being the most significant) will
be also active this month; in addition to increasing Sporadic Meteors
background, they will provide good conditions for MS DXing.
Theoretical peaktimes for May meteorshowers can be found here:

Annual Armed Forces Day Crossband Test Scheduled for May 12

The Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test in celebration of the 62nd anniversary of Armed Forces Day (AFD). Although the actual Armed Forces Day is celebrated on the third Saturday in May -- May 19 in 2012 -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 12 to prevent conflict with the Dayton Hamvention, scheduled for May 18-20.

The annual celebration features traditional military-to-amateur crossband communications SSB voice and Morse code tests. These tests give Amateur Radio operators and short wave listeners an opportunity to demonstrate their individual technical skills and to receive recognition from the appropriate military radio station for their proven expertise. QSL cards will be provided to those stations making contact with the military stations.

Military-to-amateur crossband operations will take place on the dates and time in UTC on the frequencies listed for each station. Voice contacts will include operations in single sideband voice (SSB). Some stations, depending on propagation and staffing, may not operate the entire period. Participating military stations will transmit on selected military MARS frequencies and listen for Amateur Radio stations in the amateur bands. The military station operator will announce the specific amateur band frequency being monitored. Duration of each voice contact should be limited to 1-2 minutes.

The schedules and frequencies of participating military stations can be found in PDF format on the web at,

New Section Manager Appointed in Virgin Islands

Fred Kleber, K9VV, has been appointed as Section Manager of the Virgin Islands Section beginning May 1, 2012. Kleber, of Christainsted, is taking the reins from John Ellis, NP2B, who is planning to move out of the Section soon. Ellis has been Section Manager of the Virgin Islands since 1996. Kleber has served as the Section Emergency Coordinator of the Virgin Islands this past year.

Ellis recommended that Kleber fulfill his current term of office that continues until September 30, 2012. In response, Dave Patton, NN1N, Membership and Volunteer Programs Manager, consulted with ARRL Southeastern Division Director Greg Sarratt, W4OZK, and made the appointment effective on May 1.

Nomination petitions are now being accepted at ARRL Headquarters for any qualified ARRL member who would like to run for the next term of office as the Virgin Islands Section Manger. See the notice in the April 2012 (page 80) or May 2012 (page 76) issues of QST for details on how to nominate someone for this post. [ARRL]

*A new data file has been uploaded to the Golist download page. This is the MAY 1205 data file. Use the Download button in your GoWin program for quick access to the download page. The link is~ http://golist.net/dlauth.cfm

It is recommended that you close your GoWin program before installing the new data file. This just helps~ prevent any errors from happening.

Hi friends

From FREDDY, F5IRO/J28RO

My job trip to Uganda has made my blog mute for a while.
I think to be able to reactivate it very quickly and will inform you about Uganda.

The station is quite ready to be set up ; Just some work on the vertical antenna to finih it.
I've had a contact with David, 5X1D who gave some more information about getting the 5X ticket. I've applyied for 5X5RO, but I'm not sure to get it.

More information as soon as possible -

Bonjour à tous

Novelles de Freddy, J28RO/F5IRO

Après quelques jours d'inactivité du blog en raison de mon déplacement en Ouganda, celui-ci devrait reprendre du service. Concernant le trafic radio, la station est prête, demain la verticale home made sera terminée. David 5X1D m'a contacté hier afin de m'éclairer sur la suite des événements pour l'obtention de la licence. Grâce à son action je pense être sur l'air jeudi prochain, j'ai demandé l'indicatif 5X5RO sans être certain de son attribution

In order to facilitate retrieval of DXCC card checkers for the DXCC, WAS, VUCC and WAC programs besides the individual search feature on the DXCC web site, I have also posted a link to a file called DXCC Card Checker Master. This link will take you to the complete list of card checkers worldwide. In addition, an added purpose for this file is to help you locate a card checker near you that is authorized to check 160 Meters.

Remember, all checkers can now check deleted entities but certain restrictions still apply to 160 meters, as follows:

In the attached file you'll see entries that are in BOLD/RED.

These checkers are authorized to check 160 Meter cards. As per the new rule only card checkers with an active 160 Meter DXCC award account are authorized to verify 160 Meters. If your card checker is not noted in bold/red please do not take 160 Meter cards for them to check. In addition to the bold/red a notation of "160M" is noted next to their callsign in superscript which also notes this permission.

Please see this link which will take you to the master list:

http://www.arrl.org/dxcc-card-checker-master-1

The search feature to do a search by your state or country for your local card checker is still available, but at this time there is no note that indicates they are eligible to check 160 Meters:

*As of May 9^th , Buzz, NI5_DX_**, is the QSL manager for ZL2WL, Wayne. Once the log file is transferred, Buzz will be able to confirm past contacts with ZL2WL, as well as any future QSOs. QSL cards will need to be printed, so please be patient and allow 6 weeks for the cards to be delivered. Wayne is very happy that his contacts will now be able to be confirmed with a QSL card. He has not sent out cards since his wife, ZL2MAB, became a SK last November, as she handled the QSL duties.*

CARD CHECKER AND 160 METERS -

In order to facilitate retrieval of DXCC card checkers for the DXCC, WAS,
VUCC and WAC programs besides the individual search feature on the DXCC web

site, I have also posted a link to a file called DXCC Card Checker Master. This link will take you to the complete list of card checkers worldwide. In addition, an added purpose for this file is to help you locate a card checker near you that is authorized to check 160 Meters.
Remember, all checkers can now check deleted entities but certain restrictions still apply to 160 meters, as follows:
In the attached file you'll see entries that are in BOLD/RED.
These checkers are authorized to check 160 Meter cards. As per the new rule only card checkers with an active 160 Meter DXCC award account are authorized to verify 160 Meters. If your card checker is not noted in bold/red please do not take 160 Meter cards for them to check. In addition to the bold/red a notation of "160M" is noted next to their callsign in superscript which also notes this permission.
Please see this link which will take you to the master list:
http://www.arrl.org/dxcc-card-checker-master-1
The search feature to do a search by your state or country for your local card checker is still available, but at this time there is no note that indicates they are eligible to check 160 Meters:

K6VVA/KL7 - NORTH SLOPE IOTA TOUR RE-SCHEDULED -
DATE: May 10, 2012 at 09:56 UTC
K6VVA/KL7 IOTA NA-172 NA-050 NA-004 RE-SCHEDULED
NEW Target Date: JULY 2013
This IOTA Expedition has now been rescheduled for hopefully better propagation during 2013. The far Northern Latitude has additional propagation factor complications, so in considering the total Big Picture involved, a QRX was deemed necessary to maximize possibilities for all IOTA Chasers to make QSOs.

Because of difficulties transferring ZL2WL’s past logs, Buzz – NI5DX – will only be able to confirm contacts made with Wayne, ZL2WL, from May 9th forward. Both Buzz and Wayne are very sorry for any confusion this may have caused, but contacts prior to May 9 will NOT be able to be confirmed through NI5DX. Cards are being printed and Buzz expects them to be delivered in 4-6 weeks.

21/05/2012: Andre, GM3VLB, reports "In the hope of completing what I now call the "SCOTIA challenge", which in my own case means activating the last five of the programme's 200 islands which I haven't yet activated, I am returning to the Orkney (EU-009) group, beginning 21 May, 2012. I have a return booking on 7 June but am prepared to remain in EU-009 longer, if necessary. The 5 remaining islands are Muckle Green Holm (IOSA OR32, SCOTIA OI20), Linga Holm (IOSA OR31, SCOTIA OI21), Eynhallow (IOSA OR24, SCOTIA OI24), Faray (IOSA OR23, SCOTIA OI28) and Calf of Eday (IOSA OR29, SCOTIA OI29). Some are quite difficult to approach and to land on (steep rocky shores) as well as being subject to very strong tidal current (the waters off Eday are in fact the chosen location for testing the latest tidal generators, so near-perfect weather conditions will be required. I believe most may be first-time activations. This will be a solo operation (XYL Veronica having decided discretion was the better part of valour!). If successful, I hope to continue activating islands, this season, in a more relaxed way, hopefully teaming up with regular island buddy Alex G(M)0DHZ to re-activate some less remote islands, which even some of the high-scoring SCOTIA chasers may have missed - I will be doing an analysis of the records to determine the most wanted." 425 DX NEWS MAGAZINE ---> The April 2012 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

7O6T ---> The expedition to Socotra Island, Yemen went QRT at 21 UTC on 15 May, as expected. In fifteen days 162,029 QSOs (72997 SSB, 80237 CW and 8795 RTTY) with 37,863 unique calls were made from three different locations. As part of the operating agreement, the expedition was limited to six radios and ten operators total. The planning began in February 2010, and "this trip came about as a result of focusing on being a good person and building meaningful relationships in the Republic of Yemen".

CQ 2012 HALL OF FAMERS ---> CQ Magazine announced on 18 May the 2012 Hall of Fame inductees. The CQ Amateur Radio Hall of Fame was established in January 2001 to recognize individuals - radio amateurs or not - who significantly affected the course of Amateur Radio, as well as radio amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. This year's inductees are: George Badger (W6TC), Bill Brown (WB8ELK), Robert Brown (NM7M, SK), Evelyn Gauzens (W4WYR), Richard Garriott (W5WKQ), William W. Hansen (no call, SK), Richard Kirby (ex-W0LCT/HB9BOA, SK), Fred Maia (W5YI, SK), Steve Mendelsohn (W2ML), Larry Mulvehill (WB2ZPI), Rowley Shears (G8KW, SK), Mike Staal (K6MYC), Frederick Terman (ex-6FT, W6AE, W6XH, SK), Patrick Tice (WA0TDA), Louis Varney (G5RV, SK) and William A. Wilson (K6ARO, SK).
The CQ Contest Hall of Fame (established in 1986) and the CQ DX Hall of Fame (established in 1967) honour those amateurs who not only excel in personal performance in these major areas of amateur radio, but who also "give back" to the hobby in outstanding ways. This year's inductees in the CQ Contest HoF are Jim Reisert (AD1C) and Lothar Wilke (DL3TD, SK). The 2012 inductees to the CQ DX HoF are Don Chesser (W4KVX, SK), Glenn Johnson (W0GJ) and Carl Smith (N4AA).

HEARD ISLAND 2014 ---> Cordell Expeditions has announced a DXpedition to Heard Island, in early 2014. This project follows the very successful VK0IR expedition carried out in 1997. "We have assembled a core team, arranged for the vessel, and are awaiting the landing permit and radio callsign", Bob, KK6EK says. "We will be active on all bands and all modes, implement a variety of innovative real-time communications technologies, and field a

variety of scientific projects that are designed to observe and document some of the unique resources on this extraordinary island". The website for the 2014 DXpedition is at www.cordell.org/HD/. If interested in joining the expedition, please contact KK6EK at schmieder[@]cordell.org.

QUEEN'S DIAMOND JUBILEE SPECIAL PREFIXES ---> Alan, 5B4AHJ has compiled an "almost complete" list of 2Q, GQ and MQ prefixed callsigns for stations NOT located in England. The operating period for these special callsigns celebrating the Diamond Jubilee of Queen Elizabeth II ends on 10 June [425DXN 1094]. The list is at www.clublog.org/docs/dashboard.action

TOP LISTS ---> Luciano Lucini, IK2QPO is the new manager for the Topband, Topmode and Toplist listings (www.425dxn.org/awards/toplist/index.html). Send your scores, as well as any request for further information, ik2qpo[@]425dxn.org. [TNX I2EOW]

10915. RADIO ARCALA MOVES ACROSS THREE CONTINENTS IN WPX

Yahoo group: GOLIST (2011 — 2012)

From: GOLIST
Topic: 10915 Message: 10915

RADIO ARCALA MOVES ACROSS THREE CONTINENTS IN WPX

In the summer months of the Far North, the midnight sun never sets and no QSOs are possible on the point rich lower bands. Additionally, 10M rarely opens in the North, so the only choice left to Radio Arcala and their associates is to tactically move South to satisfy their competitive urge.

The troops are still spearheaded by their battle ship, OH8X and the specific target is to reach North America with the massive hardware of Arcala fame, boldly challenging the forces of Mother Nature.

Northern Europe:

OH8X will be operated by Toni Linden, OH2UA

OH10X by Kim Ostman, OH6KZP

OH0X, Aland Islands by Pekka Holstila, OH2TA

Asiatic Turkey:

TC2X will be operated by Pertti Simovaara, OH2PM

South America:

PW0F will be operated by Ville Hiilesmaa, OH2MM/PY2ZEA

PW0F, Fernando de Noronha operation will be conducted

jointly with the Araucaria DX Group of Brazil

QSL info: OH8X via OH2UA

OH0X via OH2TA

others via OH2BH

CUBA'S RADIO HAMS GET NEW DIGITAL MODES

With great pleasure I inform to the world community of amateur radio that after a national debate and then follow the legal avenues has been approved by the department authorized by the government the use of new digital modes for all Cuban hams.
The last legislation only allowed us to work in PSK31, QPSK31, AMTOR, PACKET and RTTY.
We can now work in Domino Contestia, Olivia, MFSK, JT65, almost all variants of PSK (BPSK, QPSK, PSK-R) among others.
And more importantly, it has set up a mechanism to apply for new digimodes by any hams, I have asked already some who were not authorized, including WSPR, JT6M, HSMM, PACTOR II and III, FSK441, among others.
Another important step is that they have authorized access to the FRC's internal network using packet radio nodes, and have authorized the use of packet gateways in cross bands (HF/VHF, etc.)
Cuban radio amateurs are pleased with this approval that puts us on a par with colleagues anywhere in the world.

PRESS RELEASE:
Helsinki, May,21.2012
>From the Desk of Radio Arcala
RADIO ARCALA MOVES ACROSS THREE CONTINENTS IN WPX

In the summer months of the Far North, the midnight sun never sets and no QSOs are possible on the point rich lower bands. Additionally, 10M rarely opens in the North, so the only choice left to Radio Arcala and their associates is to tactically move South to satisfy their competitive urge.
The troops are still spearheaded by their battle ship, OH8X and the specific target is to reach North America with the massive hardware of Arcala fame, boldly challenging the forces of Mother Nature.

Northern Europe:
OH8X will be operated by Toni Linden, OH2UA
OH10X by Kim Ostman, OH6KZP
OH0X, Aland Islands by Pekka Holstila, OH2TA

Asiatic Turkey:
TC2X will be operated by Pertti Simovaara, OH2PM

South America:
PW0F will be operated by Ville Hiilesmaa, OH2MM/PY2ZEA
PW0F, Fernando de Noronha operation will be conducted jointly with the Araucaria DX Group of Brazil

OFFICIAL LAUNCH OF THE GRAGGY ISLAND DXPEDITION GROUP
The Galway VHF Group will be officially launching of the Craggy Island DXpedition Group using the new callsign EI0TED.
The launch will take place this weekend, on Sunday the 27th of May, at the Craggy Island Parochial House which is actually located in the Burren, County Clare. A H.F. Station will be in operation between 11:00 am and 3pm on 80, 40 and possibly 20 metres. Afternoon Tea and buns have been booked for the operators and guests courtesy of "Mrs. Doyle".
Please find time to QSY to 3680 KHz after the IRTS news at Mid-day where we will take calls before QSYing to 40 metres for the rest of the afternoon. A special QSL card will be produced to mark this occasion.
Later this year there will be a number of operations from Offshore Islands round the coast of Ireland. EI3IS is an experienced kayaker and hopes to activate some of the more inaccessible islands with no landing facillities and due to the mode of transport many of these operations will be QRP. This should not present a major problem if the band conditions are reasonable.
Check out the News section of www.galwayvhfgroup.com/ where up to date announcements of our operations may be found.
Current EI0TED / EJ0TED operations may also be found on QRZ.com.
From the Southgate News.

Many of you will be working the WPX Contest, but I thought some might
be interested in the latest information from BHUTAN. Here's a Memo
from Jon, KL2A on their activity:

GL/73,
Carl, N4AA
****
May 26, 2012

First, thank you to everyone for being patient and quick in the pile
ups. The high bands have been open long hours into the night and the
low bands are not producing well yet. We have installed 3 yagi's now
with #1: 40, 20, 15, 10m; #2 30, 17, 12m; and #3 a 6el 6m. 18mhz is
really the king band at the moment and does not seem to stop,
including FB openings to NA/SA for hours too. The internet has been a
problem with wi-fi on the college campus shared by 1000 students!
Today we have installed a special connection with CAT5 direct, we hope
this helps stability. That said, going forward we hope to upload to
Clublog soon and continue to update you on our progress. Please see
our Links page for more ways to track us. (Note: Twitter is real-time)
Thank you!

*A new data file has been uploaded to the Golist download page. This is the MAY 1205-C data file. Use the Download button in your GoWin program for quick access to the download page. The link is~
http://golist.net/dlauth.cfm

It is recommended that you close your GoWin program before installing the new data file. This just helps~ prevent any errors from happening.

BITS & PIECES -

The anniversary ILLW grabs imagination
The 15th annual International Lighthouse and Lightship Weekend in August has inspired many to register early with 32 countries and nearly 250 registered already.
Although this is just over half of the countries normally attracted by the event it is slightly ahead of expectations with ten weeks to go.

The weekend increases the public awareness of lighthouses and lightships and their need for them to be preserved, promotes amateur radio and fosters international goodwill.
The event was started mainly by late Mike Dalrymple GM4SUC and the Ayr Amateur Radio Group in 1995 as the Northern Lighthouse Activity Weekend with stations at Scottish lighthouses. It quickly went international.
The third weekend in August coincides with the worldwide lighthouse open day organised by the Association of Lighthouse Keepers that sees public access to many of the featured lighthouses.
During the weekend a group or individual sets up an amateur station at or adjacent to a lighthouse, lightship or marine beacon that is listed.
To register, complete a short online form, read the event rules and have lots of fun. We have complete statistics on past events, reports from previous years and we're on Facebook too.
Visit the website at illw.net for the International Lighthouse and Lightship Weekend held on August the 18th and 19th.

WUST AWARD -
It has been a long time since a significant award has been offered to DXers and it requires submitting only 16 QSL cards with a user-friendly application. WUST is an acronym for Worked United States Territories, sponsored by the Metro DX Club located in suburban Chicago. Some of these 16 WUST territories can be heard regularly but many appear on the list of the 25 most wanted countries and can only be worked during a DXpedition to that location. Don't let this scare you away however, because you can qualify for the basic award by confirming only 14 of the 16 territories. Your remaining two can be confirmed later and endorsements are available that will signify that you have reached the ultimate goal.
Awesome wallpaper, challenging and requires minimal paper work.
The 16 WUST territories effective January 1, 2012 are: KG4 (Guantanamo Bay), KHØ (Mariana Islands), KH1 (Baker & Howland Islands), KH2 (Guam), KH3 (Johnston Island), KH4 (Midway Island), KH5 (Palmyra & Jarvis Islands), KH5K (Kingman Reef), KH7K (Kure Island), KH8 (American Samoa), KH8S (Swains Island), KH9 (Wake Island), KP1 (Navassa Island), KP2 (US Virgin Islands), KP4 (Puerto Rico) and KP5 (Desecheo Island).
Confirmations can be on mixed bands and modes and there are no date restrictions. No, it’s not as easy as you may have thought, but remember, this is a DX award. It’s not a simple certificate acknowledging contact with a special event station or commemorating an occasion. You can proudly display this distinctive certificate in your ham shack and show it to fellow hams acknowledging your efforts in the world of DX. Remember, only 14 QSL cards get you started on the road to WUST and not 340 that are required to make number 1 on the ARRL DXCC Honor Roll. If you don’t want to take the chance of mailing 16 valuable QSL cards, photocopies of confirmations will be accepted. In addition, Logbook of the World confirmations are OK and must be verified by two licensed amateur radio operators. Plus, if you are NUMBER ONE on the ARRL DXCC Honor Roll and your station call appears on the list dated August 2010 (or later) you'll not be required to send any confirmations for the WUST award. Simply file an application along with 8 US dollars or 4 valid IRCs. Mail your submission to the Metro DX Club, 3810 N. Chamlin Drive, Morris, IL 60450. Following the receipt of the original award for a minimum of 14 territories, endorsements for contact 15 and 16 are available for 3 US dollars or 2 valid IRCs. For additional information, go online to http://www.metrodxclub.com/wust_award.htm. E-mail questions should be sent to

awards@....
The new sunspot cycle is finally upon us and the bands are wide open. So what are you waiting for? If DXing is your call then WUST must be on the wall! WUST is a MUST!

CY0/VE1AWW ---> Al, CY0/VE1AWW has been QRT from Sable Island since 28 May.
"A migratory bird (and protected species) was found near my towers with
injuries suggesting a collision with one of the towers", he says. "I am
required to take down the towers until an investigation and policy can be
developed for tern season (April-August)".

ST PAUL ISLAND 2012 ---> In their latest press release (25 May), the CY9M team reported that on 25 July they "will be making their way to Sydney, Nova Scotia, then onwards to the northernmost tip of Cape Breton, ready to depart for St Paul island on July 26th". A few of the team plan to be QRV as VE1/callsign from Cape Breton Island (NA-010) prior to CY9M. There are few landing spots on St Paul, and "actual station location will be determined where we land. From planning discussions, we know each proposed location has positives and negatives to certain regions around the globe - therefore this is very much an 'on the day' set-up at any given landing spot. Now the shipping process begins". Further information, including log search, OQRS and details on how contribute, can be found at www.cy9m.com

XR0ZA ---> A team of operators from Radio Club de Valparaiso went to Robinson Crusoe Island (Juan Fernandez) to set up a radio and conduct an earthquake and tsunami drill. In their spare time they were QRV as XR0ZA. QSL via CE2AA.

EMERGENCY COMMUNICATIONS IN ITALY -
As a result of further tremors on the afternoon of May 29 emergency communication has been intensified by the radio amateurs. Due to a request of the Italian civil defence authority the National emergency radio and volunteer group (RNRE) sent a mobile unit of five radio amateurs to the crisis region in northern Italy and prepared two other units which are ready for immediate use. The HF frequency 7060 kHz is used by IQ1HQ, the RNRE headquarters, and IQ0TK, the civil defence authority in Rome. VHF links are currently running on 145.200 MHz. The main earthquake occurred on May 20 at 0200 UTC in the region of Emilia

Romagna in northern Italy.

APOLLO PROGRAM ---> ARI Tortona (IQ1TW) will commemorate the Apollo Space Program (1961-1972) between 1 and 31 July. Further information on the relevant award can be found at http://aritortona.xoom.it or from Pier Paolo Liuzzo (IZ1XBB, iz1xbb[@]tiscali.it). [TNX IZ1XBB]

DXCC NEWS ---> XX9E (Macao, 2012 operation) has been approved for DXCC credit. [TNX NC1L]

IDXC 2013 ---> Sponsored by the Northern California DX Club, the 64th Annual International DX Convention will be held at the Visalia Conference Center in downtown Visalia, California on 19-21 April 2013. Please check the IDXC website (www.dxconvention.com) during the week of 18 June for details about booking hotel rooms for the Convention.

IOTA EU-155 ---> Back in October 2011 [425DXN 1069] the RSGB IOTA Manager reported that "following information received from a local operator in Italy that the only two islands listed as qualifying for EU-155, Baron and Scanno di Piallazza, no longer existed, we would not be accepting for credit any new operations claiming to take place from EU-155 pending a final check. This has now been carried out and it confirms the report. Under IOTA rules we have no option but to withdraw EU-155 from the list of valid IOTA groups and to amend scores down. However we have noted that the Po Delta is a remarkably fragile natural environment with a varying sedimentation rate influenced by river flow, tide and storm and have not ruled out the possibility of one of the islands reforming in time. In the circumstances, we have decided to remove EU-155 credit from all scores on 1 September 2012 but to retain the QSO information on the database in a non-counting format in case the situation should change. We will review the position periodically. In the meantime, while credit will not be given for new operations, we will allow credit for pre-October 2011 operations for certificate purposes only in applications received before 1 September 2012". [TNX Roger Balister, G3KMA, RSGB IOTA Manager]

IOTA NEWS ---> The following operations in the period February to May 2012 have provided acceptable validation and are therefore approved for IOTA credit: AT2DW (AS-175), XF1AA (NA-189), 4A3RCC (NA-200), KL7RRC/P (NA-240), 4W0VB/P (OC-232), and CW5GI (SA-039). The 7O6T (AF-028) operation, which has been accepted for DXCC, is also approved. [TNX G3KMA]

QSL 4U1ITU, 4U1UN & 4U1WRC ---> Get your missing QSLs for QSOs with 4U1ITU, 4U1UN and 4U1WRC (2012) at the Swiss DX Foundation's booth at Hamradio 2012 (Friedrichshafen) on 22-24 June. Bring your QSO data with you and observe the working hours of the QSL manager (to be available at the booth). [TNX HB9BOU]

TOPBAND MOST WANTED SURVEY ---> All 160m enthusiasts are invited to participate in the 2012 Topband Most Wanted Survey conducted by NI6T and K8UT. The survey will be running until 31 August and can be found at http://survey.hamdocs.com/?sid=11389. The results will be available in September.

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Luciano Lucini, IK2QPO (ik2qpo[@]425dxn.org).

10943. IRC Question

Yahoo group: GOLIST (2011 — 2012)
Date: 2012-06-11 17:28:38 UTC
From: DICK THOMPSON
Topic: 10943 Message: 10943

A friend of mine, KB0B, has some IRC's and a question. On some IRC's that he has, there is a postmark in the lower left corner, and to the right of the postmark there is, for example, Argentine on one of them, Amerique (Etats-Unis) on another and on another Italie. Now, the question: Can any/all of these be used as return postage from Rusiia if he sends them to a Russian station or are they only good for the name of the country printed in the IRC?

He purchased these from a ham online and is wondering if they are usable.

Please direct any replies to me and/or to Bob, KB0B41@....

Yes, they can all be used in Russia. Countries that sell IRCs have them printed with their country name, flag, or both preprinted on the IRC. When purchased, the respective post office is supposed to "round date/stamp" the IRC in the bottom left-hand corner. When the IRCs are redeemed in any country to which they are sent, will redeem for outgoing postage and likewise "round date/stamp" the IRC...but in this case the lower right-hand corner.

I always assumed that an IRC could only be used for return postage to
the country where it was issued (i.e. where the left-hand stamp was
made). Otherwise, if, say, I receive a card from a JA with an IRC
(stamped in JA), I could pay the $1.05 to buy a stamp, and use the IRC
in an outgoing QSL request that I'm sending to some other country.
Since the IRC would normally cost me $2.20 (or thereabouts), I'd be
making a profit.

Does anyone know, definitively, how this is supposed to work? I've not
yet found any documentation that states it clearly...

Any time I redeem IRCs at the post office, I simply hand them say 20 stamped IRCs from say a collection of 10 different countries and the teller hands me 20 air mail stamps. They don't care where the IRCs came from and they don't care where my outgoing letters are going.

One IRC gets me one airmail stamp. 20 IRCs get me 20 airmail stamps, etc. The actual verbiage is "one unit of airmail postage" I think. But here in the US it gets me a $1.05 airmail stamp per IRC I redeem.

Hello DXers:

Press Release # 2 from the 1A0C team:

Following the first press release about 1A0C, we proudly announce that the website about the amateur radio activity that will be held from 1st to 4th July 2012 in Santa Maria del Priorato is now online. You can visit it at http://www.1a0c.com.

While you'll find full details on the activation on the website, we would like to remind you the strong commitment of the team to offer the elusive 1A entity to as many hams outside Europe as possible. So, since the beginning, we ask for understanding from European operators, reminding them ham radio is also about being fair.

The website also contains a "Donation" page. We ask every ham interested to work 1A to check it, as the July activation of Malta Order has a goal beyond amateur radio. Every QSO will contribute to that goal, so it's really important to raise awareness about our project.

Thanking in advance for cooperation and help in spreading the word, we kindly ask anyone looking for further detail to get in touch with our p.r. and media contact at 1a0c@...

Until next week, enjoy the chase but do HAVE FUN ! !

Etherkit debuts with open source QRSS transmitter kit -
Etherkit, a new amateur radio kit company devoted to open source hardware,

has released its first product for sale.
OpenBeacon is an open source crystal-controlled QRPp beacon transmitter kit which can output a variety of slow-speed modes, including QRSS, DFCW, and Sequential Multi-tone Hellschreiber
It is configured via USB port, so there are no jumpers to set and you can easily adjust all of the operating parameters via command line.
Once configuration is complete, OpenBeacon may be removed from the PC and operate stand-alone, as the on-board microcontroller stores all settings.

German amateurs get 472-479kHz band -

Ofcom announces that a small block of 2m is required for the London 2012 Summer Olympic Games -
In the July RadCom it was announced that Ofcom had approached the RSGB to discuss temporary usage of a few channels on 2m to support the London 2012 Summer Olympic Games. Following negotiations with the RSGB to minimise the impact on amateurs, Ofcom has now announced that it will temporarily authorise a small block of 12.5kHz channels on that band. The frequencies are from 144.0125MHz to 144.1375MHz, but only for the period 27 July to 28 August 2012. The frequencies specifically exclude the CW calling frequency, 144.050MHz, and the Meteor Scatter calling frequency, 144.100MHz. Ofcom are also aware of the various contests on 4 and 7 August and will work with Game users to keep operations to a minimum on these dates. Usage of this spectrum by Games users will be in the vicinity of London Olympic venues, and will be limited to handhelds with a maximum output of 5 watts. Ofcom emphasises that use of Primary Amateur spectrum is only for the specified time period and does not constitute a change of usage. The full Ofcom statement can be found at: www.rsgb.org/olympics. DXCC NEWS ---> TL8ES (Central African Republic, 2011 operation) and TT8ES
(Chad, 2012 operation have been approved for DXCC credit. [TNX NC1L]

HEARD ISLAND 2014 ---> The initial operators for the 2014 expedition to Heard Island (www.heardisland.org) include KK6EK, ON6TT, DL1MGB, N6MZ, DJ9ZB, NP4IW, AD6E, N4GRN, DJ5IW, N6PSE, W3WL, W0GJ and AA7XT. The next round of team members will be announced on 15 August.

IOTA EU-117 & EU-133 GROUPS ---> This is an abridged version of the official announcement dated 16 June that can be found on the RSGB IOTA's website.
Following the decision by the ARRL to delete Malyy Vysotskiy Island (MVI) from the current DXCC list as of 17 February 2012, the IOTA Committee has considered action to be taken with regard to the future of EU-117. A consultation conducted by an enlarged IOTA management group produced a clear majority in favour of splitting EU-133 to form two groups within the Gulf of Finland, North and South. The dividing line has been set at 60 degrees, 15 minutes north. The islands now constituting the two groups can be seen via the Search facility on www.rsgbiota.org. The change has an effective date backdated to 17 February 2012. Past credits for MVI will continue to stand and new opportunities are created for contacting EU-117. Record-holders need take no action regarding existing credits as they will not be deleted as a consequence of this change, nor in the case of EU-133 credits need they be transferred unless requested.

OH10X/MM ---> Kristina Cruises Ltd with Radio Arcala, OH8X of Finland, are in the process of testing whether a permanent Amateur Radio station will suit the maritime environment and serve DXers in their leisure time, whether cruising in the Mediterranean or off West Africa or just doing island-hopping in the Caribbean.
The onboard station will be active at the peak propagation hours to various continents on 14267 kHz on 20-24 June. The test cruise will take the ship to Estonia (ES), Gotland, Sweden (SM1), Aland Islands (OH0), and back to Finland. The objective for the first run is to look at potential interference issues both ways - from the Amateur Radio station to the ship's navigation system and from the ship's advanced PC networks to the reception of Amateur Radio transmissions.

YASME AWARDS ---> The Yasme Foundation has for many years offered two Yasme Awards, available at no cost to qualifying applicants. The first Yasme Award, in the form of a handsome plaque, is offered to those amateurs who submit proof of 30 QSOs with Yasme officials and DXpeditions that have at least one Yasme official as a participant. The second, the Yasme Supreme Award, is in the form of a representation of the YASME boat used by Danny Weil in his around-the-world DXpedition and is available to those who submit proof of 60 QSOs with Yasme officials and DXpeditions with a Yasme official as a participant.
After a year-long evaluation of the rules for qualifying call signs, the Board of Directors is pleased to announce that the rules for qualifying call signs have been revised. As a result, many call signs have been added to the list. The revised list of call signs eligible for both awards is available at http://www.yasme.org/DXpeditions.html

Bonjour à tous
Du 12 au 15 juillet, la station spéciale TM70TRS (indicatif spécial pour
la commémoration du 70ème anniversaire de la création de l’arme des
transmissions dans l’armée de terre) sera active
depuis la plateforme supérieure du 3ème étage de la Tour Eiffel, ce qui n’
est pas arrivé souvent, voire même jamais. C’est une autorisation très
difficile à obtenir et c’est fait.
L’indicatif TM70TRS pourra être remplacé par TM70TE
Les opérateurs, tous militaires de cette station spéciale seront F5SKW,
F5SWB, F5IRO, F8CRS et F5PRU.
Ils seront actifs en SSB, CW et RTTY en HF et VHF (Locator JN18DU).

F6KHX et F5OGL.
Le 14 juillet au matin et en marge du défilé militaire sur les Champs
Elysées, un reportage sur cette opération sera diffusé sur TF1.
Les opérateurs ont été filmés par une équipe de télévision dirigée par

Anne-Claire Coudray, journaliste très connue de cette chaîne, lors des essais qui ont été réalisés le 19 juin depuis ce troisième étage.

Bonne chance à tous
Merci de faire suivre à vos clubs et amis.

3D2C, CONWAY REEF (Press Release).
Paul Ewing, N6PSE, sent out the following press release #1 on July 3rd:
"The World-Wide DX Group, led by Hrane Milosevic-YT1AD, is pleased to announce our next DXpedition, as 3D2C from the remote South-Pacific atoll of Conway Reef. This Dxpedition will take place from September 24th to October 5th, 2012. The World-Wide DX Group is the same group which brought you the recent 3D2C Rotuma Island Dxpedition in September, 2011.
Our primary objective is to activate Conway Reef with a goal of providing as many DXers as possible a "new one" with this rare DXCC entity and, as a secondary objective, to give as many band-slots as possible. We will target European contacts during those periods when propagation is possible and we will ask JA and North America to stand buy during those brief periods when the bands are open to EU.
The team consists of sixteen operators including: Leader-Hrane Milozevic-YT1AD, Co-Leader Alex Romanov-UA4HOX, Co-Leader Paul Ewing-N6PSE, Dave Flack-AH6HY, David Jorgensen-WD5COV, Vasily Kozerodov-RW4NW, Dr. Alan Eshelman-K6SRZ-Team Physician, Alan Maenchen-AD6E, Sergej Yanovsky-RZ3FW, Craig Thompson-K9CT, Stanislav Vatev-LZ1CG, George Williams-N6NKT, Alexander Kuznetsov-RW3RN, Peter Sprengel-PY5CC and Mike Flowers-K6MKF.
Our QSL Manager is Hrane Milosevic-YT1AD. We will have OQRS, we will accept direct and bureau QSL cards. We plan to upload our logs to Club Log on a daily basis.
At this time, we are seeking Foundation, Club and individual support for this Dxpedition.
You can find out more about our plans at our website:
http://www.yt1ad.info/3d2c/index.html
Thank you,
The World-Wide-DX Group"

CQ NEW (Press Release).
Richard Moseson, W2VU, sent out the following press release on July 3rd:
"Logbook of the World Support for CQ WPX Award Goes "Live" -- Participants in CQ magazine's WPX award program may now use the American Radio Relay League's Logbook of the World (LoTW) system to apply for the WPX award and its endorsements. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply. LoTW support for the WPX award went 'live' on July 2. Logbook of the World is the ARRL's electronic confirmation system for amateur radio contacts. It provides a confirmation when both stations in a contact submit their logs to the system and a match between the logs is confirmed.
The application process for the WPX award via LoTW is the same as applying for ARRL-sponsored awards (such as DXCC and Worked All States), according to ARRL, which adds that Logbook users will notice that a WPX account has automatically been created for them on their LoTW awards page.

ARRL adds that amateurs wishing to apply for the WPX Award via Logbook of the World will pay 12 cents for each QSO they use in their application. A separate fee for the WPX Award (and endorsements) is payable to CQ: Subscribers will be charged $6 for each award, while non-subscribers will be charged $12 for each award. Endorsement stickers are $1 each.
WPX is the first non-ARRL award supported by LoTW. Support for the rest of CQ's operating achievement awards - including Worked All Zones (WAZ), the USA-Counties Award (USA-CA) and the CQ DX and DX Field Awards - will be phased in over time.
ARRL (www.arrl.org) is the National Association for Amateur Radio in the United States and publisher of QST magazine. CQ Communications, Inc. <www.cqcomm.com> is publisher of CQ Amateur Radio magazine and is the world's largest independent publisher of amateur radio magazines, books and videos."

Bonjour à tous

Merci à Freddy, F5IRO:

Opération depuis la Tour Eiffel, Mise à jour :

Du 12 au 14 juillet, la station spéciale TM70TE (indicatif spécial pour la commémoration du 70ème anniversaire de la création de l'arme des transmissions dans l'armée de terre) sera active depuis la plateforme supérieure du 3ème étage de la Tour Eiffel.

Les opérateurs, tous militaires de cette station spéciale seront Philippe/F5SKW, Dimitri/F5SWB, Freddy/F5IRO, David/F8CRS and Yves-Michel/F5PRU

Nous seront actifs en SSB et CW avec deux stations HF et une VHF si l'environnement électromagnétique ne perturbe pas excessivement cette dernière bande.

L'espace dédié aux antennes et les contraintes par d'autres services de télécommunications prioritaires sur notre activité, nous obligent à utiliser des antennes type mobile.

Les 12 et 13 Juillet: F8CRS F5IRO et F5SKW
Le 14 Juillet: identique plus F5PRU. F5SWB sera présent en pointillé.

L'activation, commencera le matin chaque jour vers 08h00 pour se terminer le soir vers 22 ou 23h environ.

Une carte QSL spéciale sera éditée pour cet évènement via le radio-club du 44°RT F5KBB.

Le 14 juillet au matin en marge du défilé militaire sur les Champs Elysées, un reportage sur cette opération sera diffusé sur TF1. Une partie des opérateurs ont été filmés par une équipe de télévision dirigée par Anne-Claire Coudray, journaliste très connue de cette chaîne, lors des essais qui ont été réalisés le 19 juin depuis ce troisième étage.

11021. IARU HF Championship

Yahoo group: GOLIST (2011 — 2012)
Date: 2012-07-14 00:43:40 UTC
From: GOLIST
Topic: 11021 Message: 11021

Hello DXers/Contesters:

This weekend, from 1200Z on Saturday to 1200Z on Sunday, is the annual IARU HF Championship Contest. There aren't a lot of specifically designated Announced Operations for this one since you can work anyone, anywhere. Of course there are different point values for different categories of contacts to make it more interesting. If you need more on that, go to: http://www.arrl.org/iaru-hf-championship/

This year there is an extra "contest in a contest" with the WRTC2014 activity. I'll include the entire text of the announcement for you to see what they are doing. This just adds another fun part to the weeknd.

Enjoy the contest but HAVE FUN !!

73,
Carl, N4AA

WRTC2014 STATION TEST IN IARU HF CHAMPIONSHIP

WRTC2014, Inc., host of the 2014 World Radiosport Team Championship competition, will be conducting station tests during the 2012 IARU HF Championship contest this weekend. Thirteen stations will be set up in the WRTC competition configuration using sites planned for 2014. Awards will be offered for working the WRTC test stations.

"This is an important milestone in our preparation efforts," said WRTC Chairman, Doug Grant, K1DG.
"Beam teams will collect equipment and do the setup and tear down of tower and antennas at each site. Site teams will be responsible for managing the site and the generator for the weekend. Operating teams have volunteered to put the stations on the air so we can gather data on propagation and site effectiveness. It will be exciting to finally convert planning and preparation into action."

The callsigns to be used by the WRTC test sites are:
K1GQ K1RQ K1ZD N2KW N9NB NI1L
W1HH W1MA W1MJ W1SJ W1UE W1UJ WB1Z

The test stations will be active on 10 – 80 meters on both CW and SSB. The contest runs for 24 hours beginning 1200 UTC on July 14. Many of the test stations will be operating according to the WRTC competition Rules (http://www.wrtc2014.org/competition/wrtc-rules/).

"One mission of the station test is to confirm that all sites are relatively equal," said Tom Frenaye, K1KI, Director of the Site Acquisition and Testing Committee. "As you hear or work the test

stations, please make a note of their signals in comparison to the other WRTC test stations." Signal reports and other feedback should be sent to info@....

To help generate more activity and data, WRTC2014 is offering awards to encourage people to work the test stations. The awards are:
• A WRTC T-shirt will be awarded to the 5 callsigns (outside W1) that work the WRTC test stations on the most band-modes.
• A WRTC T-shirt will be awarded to the 3 callsigns outside North America that work the WRTC test stations on the most band-modes.
• Everyone who works the WRTC test stations on 4 or more band-modes will be entered into a drawing to win a WRTC mouse pad or hat. Ten winners will be drawn.

See the WRTC shop for description of the prizes: http://shop.wrtc2014.org
No log submissions are required. Simply work the test stations on as many band modes as possible. IARU HQ stations are not eligible for the awards. Logs from the test stations will be made public.

Pictures and other information about the station tests will be available on the WRTC2014 web site after the contest.

For information about WRTC2014, contact WRTC Chairman, Doug Grant, K1DG, via e-mail atk1dg@....

About WRTC2014
The World Radiosport Team Championship (WRTC) is held every four years and consists of approximately 50 two-person teams of amateur radio operators from around the world competing in a test of operating skill. Unlike most on-the-air competitions, all stations are required to use identical antennas from the same geographic region, eliminating all variables except operating ability. Previous WRTCs have been held in Seattle(1990), San Francisco(1996), Slovenia(2000), Finland(2002), Brazil(2006), and Russia(2010). More information is available at www.wrtc2014.org or contact WRTC Chairman, Doug Grant, K1DG, via e-mail at k1dg@....

NH8S - Swains Island
Press Release #2
Craig, K9CT, and Joe, W8GEX, are happy to report that preparations for the NH8S Swains Island DXpedition are on schedule. The 20 man international team should be on the island from September 4, thru September 17. Swains is # 31 most wanted worldwide. They will operate all bands with SSB, CW and RTTY.
A big thank you goes to John, N7CQQ, and Paul, W8AEF, for their time in building and testing the SVDA's that will be used. Thanks also to Paul, W6XA, and Tom, N4XP, for testing the radios, amps and laptops. All of the equipment has been shipped to Arnie, N6HC, in California for the upcoming departure via cargo ship later this week. The QSLing will be handled by Joe, AA4NN, with help from his XYL Margarett. Plans are to upload logs daily by satellite phone from the island to ClubLog.
We are very grateful to our equipment sponsors, including: ICOM, Elecraft, Vibroplex, Innovantennas, DX Engineering, Heil Sound, Primus, Hi-Z Antennas, and The RF Connection. Also to Kimo, KH7U, for the 160m vertical, and George, W8UVZ, for the Battle Creek Special.
We have updated our website with pictures, operating information and links. Thanks to John, K6MM, for doing the webmaster duties.
There will be a great emphasis placed in working Europe where Swains is most needed. We will have several receiving antennas aimed that direction.
It will be very hot and humid, and mosquitoes should be plentiful, so please have patience with the operators. We ask that you listen to the operator instructions to ensure we are able to work as many stations as possible.
This tent and generator operation is a very expensive endeavor, and the group is most grateful for the foundations, clubs and individuals who have already contributed. For those that would like to donate, you may do so from our website: www.nh8s.org/
The skilled international crew that is looking forward to working you includes: 9V1FJ, AA4NN, DJ2VO, DL3DXX, K5AB, K9CS, K9CT, K9NW, KB8OCP, N2TU, N4HH, N6HC, NA6M, ND2T, SM5AQD, W4BUW, W6KK, W8GEX, W8TN and WB9Z.

*A new data file has been uploaded to the Golist download page. This is the JULY 1207-C data file. Use the Download button in your GoWin program for quick access to the download page. The link is~ http://golist.net/dlauth.cfm

It is recommended that you close your GoWin program before installing the new data file. This just helps~ prevent any errors from happening.

A limited Market Reef (OJ0) activation during the IOTA Contest...
Press Release 23 July 2012
Next Friday morning on the 27th of July a group consisting of Nigel G3TXF, Don G3XTT, Tore SM0DZB and Teemu SM0W will attempt to land on Market Reef (OJ0), now from Sweden, with a small boat to activate the Reef during the IOTA contest as OJ0R, EU-053. During last winter the Lighthouse on the Reef lost all permanent antennas plus the wind generator, so the team will put up several vertical antennas and dipoles and run modest power.
The main goal for the team on this trip will be to prepare for a new permanent antenna installation that will be done later in August. SM0W will also collaborate with the Finnish Lighthouse Society to find a good permanent solution for the electricity for future activations. They will still try to keep at least one station open for the IOTA contest. The team will try to leave the Reef early Monday morning on the 30th of July, says team leader Teemu, SM0W. For more information see: www.qrz.com/db/oj0r

CHILTERN DX CLUB ---> On 21 July the Chiltern DX Club (www.cdxc.org.uk), the UK DX Foundation elected its Committee for the coming year: G3NUG (President), G3SVL (Chairman), G3USR (Treasurer), G4LDL (Secretary), G3RFX (Digest Editor), G4AXX, G4FKA and G4PFF.

CQ CONTESTS NEW DEADLINE ---> Participants in CQ-sponsored contests will now have five days after the end of a contest to either upload or mail their logs. "This is the first step in an effort to speed the processing and reporting of CQ contest results", CQ magazine Editor Rich Moseson (W2VU) explained, "and it is one more step in our ongoing efforts to help ensure the integrity of submitted logs. Shortening the deadline reduces the time available for those who might be tempted to 'cleanse' their logs after the contest". However, "we realize that in some cases circumstances may not allow a timely submission", CQ WW Contest Director Bob Cox (K3EST) says. "Requests for an extension must be received before the log submission deadline by sending an e-mail to questions[at] cqww.com". The change takes effect with this year's CQ World Wide DX Contest and will apply to all future CQ-sponsored contests.

CY9M & IOTA CONTEST ---> CY9M, St. Paul Island (www.cy9m.com) will participate in the IOTA contest this weekend. Their contest operation will be limited to 20 metres only, SSB and CW. The contest log will be merged with the regular DX operation, so there is no need to work them twice. The CY9M QSL card will be used for confirmation, the log will be uploaded to LoTW and submitted to the IOTA Contest manager.

V8 & 6 METRES ---> The Magic Band is coming back to Brunei after a silence of more than ten years. The V84SMD expedition (11-23 November) has been

granted permission to be active on 6 metres, and will have a dedicated antenna. See http://www.mdxc.org/v84smd/

+ SILENT KEYS + Paul Caboche (3B8AD, ex VQ8AS and VQ8AD) passed away on 24 July. Born in 1918, he was the oldest amateur radio operator in Mauritius and the first Chairman of the Mauritius Amateur Radio Society (1967-93). Other recently reported Silent Keys include Sergey V. Zhuchkov (R9WW), Charles D. Shinn (W5PG) and George S. Badalian (EK6GB), a doyen of amateur radio in his country and the President of the Federation of Radiosport of the Republic of Armenia (FRRA).

CHILTERN DX CLUB ---> On 21 July the Chiltern DX Club (
www.cdxc.org.uk),
the UK DX Foundation elected its Committee for the coming year:
G3NUG
(President), G3SVL (Chairman), G3USR (Treasurer), G4LDL (Secretary),
G3RFX
(Digest Editor), G4AXX, G4FKA and G4PFF.

CQ CONTESTS NEW DEADLINE ---> Participants in CQ-sponsored contests
will
now have five days after the end of a contest to either upload or
mail

their logs. "This is the first step in an effort to speed the processing
and reporting of CQ contest results", CQ magazine Editor Rich Moseson
(W2VU) explained, "and it is one more step in our ongoing efforts to help
ensure the integrity of submitted logs. Shortening the deadline reduces the
time available for those who might be tempted to 'cleanse' their logs after
the contest". However, "we realize that in some cases circumstances may not
allow a timely submission", CQ WW Contest Director Bob Cox (K3EST) says.
"Requests for an extension must be received before the log submission
deadline by sending an e-mail to questions[at] cqww.com". The change takes
effect with this year's CQ World Wide DX Contest and will apply to all
future CQ-sponsored contests.

CY9M & IOTA CONTEST ---> CY9M, St. Paul Island (www.cy9m.com) will
participate in the IOTA contest this weekend. Their contest operation will
be limited to 20 metres only, SSB and CW. The contest log will be merged
with the regular DX operation, so there is no need to work them twice. The
CY9M QSL card will be used for confirmation, the log will be uploaded to
LoTW and submitted to the IOTA Contest manager.

V8 & 6 METRES ---> The Magic Band is coming back to Brunei after a silence
of more than ten years. The V84SMD expedition (11-23 November) has been
granted permission to be active on 6 metres, and will have a dedicated
antenna. See http://www.mdxc.org/v84smd/

+ SILENT KEYS + Paul Caboche (3B8AD, ex VQ8AS and VQ8AD) passed away on 24
July. Born in 1918, he was the oldest amateur radio operator in Mauritius
and the first Chairman of the Mauritius Amateur Radio Society (1967-93).
Other recently reported Silent Keys include Sergey V. Zhuchkov (R9WW),
Charles D. Shinn (W5PG) and George S. Badalian (EK6GB), a doyen of

amateur
radio in his country and the President of the Federation of
Radiosport of
the Republic of Armenia (FRRA).

11055. 3B8AD, Paul Caboche, became a Silent Key

Topic: 11055 Message: 11055

My good friend Rachid, 3B8FQ (aka 3B6FQ / 3B7FQ) advised me that very well-known OT 3B8AD, Paul Caboche, became a Silent Key on 25 July. Paul is remembered as a communications pioneer and was active on many islands in the Indian Ocean. He was inactive in recent years due to illness. Older DXers may remember Paul as VQ8AD, etc. (http://hamgallery.com/qsl/country/Mauritius/vq8ad.htm) He was 94.

Jacky / 3B8CF made the following announcement on the IARU Region 1 website,
“Paul was the oldest ham in Mauritius. His first call was VQ8AS in the Chagos back in 1937. Later he got the call VQ8AD, then in 1970 he became 3B8AD. He was the first chairman of MARS (Mauritius Amateur Radio Society) and held this post for many years, from 1967 to 1993.
He has done much to protect the interests of ham radio in Mauritius and to promote this hobby
over the years. May he rest in Peace! Jacky, 3B8CF”

NI5DX, Buzz, is now serving as QSL manager for 3B8CW, Clive, on Mauritius Island. Buzz has Clive’s past logs and will be able to confirm contacts made with 3B8CW from September 1, 2011 onward. Clive is using a Mosley TA-33 antenna at the present time, but is considering building/buying a HexBeam to improve his signal and allow operation on the 79-WARC bands. A QSL card is now being designed and will be printed soon. Please allow for a short delay in response if sending for a card before they arrive from the printer. This is generally 4-6 weeks after the order is placed.

Icom IC756 PRO for sale. If you have worked K4BAI when we go mobile this is the radio we use. I have upgraded to a IC756 PRO II from my dad’s old station. Only problem I am aware of is the background light (LED ?) for the meter is burnt out. Probably a loose connection but shouldn’t cost much to fix. I have reflected this in my asking price. $800 plus shipping.

*On August 3, the ITU updated its Table of International Call Sign Series to reflect a call sign change for Niue. The island will now have the entire E6 prefix block. Niue – an island approximately 1700 miles northeast of New Zealand – is a self-governing island nation that has been in free association with New Zealand since 1974. Prior to the change, the island used ZK2.

11077. Conway Reef Press Release

Yahoo group: GOLIST (2011 — 2012)
Date: 2012-08-08 12:01:37 UTC
From: GOLIST
Topic: 11077 Message: 11077

After many months of careful planning, we are pleased to announce that our preparations for a large multi-national Dxpedition to Conway Reef are going according to plan.

Conway Reef is located in the South Pacific Ocean and is #35 on Club Log's most wanted DXCC list.

The Team is meeting in Lami Bay, Suva and departing by ship to Conway Reef on September 24th. The Team expects to arrive at Conway Reef and become active on September 26th. We will complete our Dxpedition on October 5th, 2012.

The main goals of this DXpedition are to work every amateur radio operator who needs Conway Reef for a new DXCC country. In addition, we will be active on all bands from 1.8 MHz to 144 MHz, including the 5MHz and 50 MHz bands.

We will be active on CW, SSB and RTTY. Special attention will be made to work far away stations such as Europe and Africa during those periods when propagation permits. The propagation window for EU and Africa is very brief at times and signals may be weak, so we ask everyone in the honored HAM SPIRIT to stand by when asked so that we may fulfill this need. Our destination will have a wide range of options and possibilities.

We plan to upload our logs on a daily basis to our on-line log. We will upload to LOTW approximately six months following the DXpedition.

Our team consists of these Operators: Hrane-YT1AD-Leader, Aleksej-UA4HOX-Co-Leader-Operations, Paul-N6PSE-Co-Leader-PR & Fundraising, David-WD5COV, Vasily-RW4NW, David-AH6HY, Alan-K6SRZ-Team Physician, Alan-AD6E, Sergej-RZ3FW, Craig-K9CT, Stan-LZ1GC, George-N6NKT, Peter-PY5CC, Mike-K6MKF, Jim-K9JM, Miguel-PY3MM and Luciano-PY5KD.

We wish everyone good propagation and we hope that you enjoy working the 3D2C Team.

From: GOLIST
Topic: 11080 Message: 11080

Hi there.

It is with great regret that I have to announce that Andreas, 5R8FL has terminated my QSL managership of his station with effect from the end of July 2012. I have his logs up to the end of June 2012 and am awaiting the log for July. I will be uploading the latest logs to LoTW and to the search
facility on my web site in the next few weeks. I have plenty of proper QSL
cards left.

I have been given no reason for the termination and have no information as to whether Andreas has made any alternative arrangements for confirming his
future QSOs.

73 for now

QSL INFO -

It is with great regret that I have to announce that Andreas, 5R8FL has terminated my QSL managership of his station with effect from the end of July 2012. I have his logs up to the end of June 2012 and am awaiting the log for July. I will be uploading the latest logs to LoTW and to the search facility on my web site in the next few weeks. I have plenty of proper QSL cards left.

I have been given no reason for the termination and have no information as to whether Andreas has made any alternative arrangements for confirming his future QSOs.

E6 - Niue
On August 3, the ITU updated its Table of International Call Sign Series to reflect a call sign change for Niue. The island will now have the entire E6 prefix block. Niue - an island approximately 1700 miles northeast of New Zealand - is a self-governing island nation that has been in free association with New Zealand since 1974. Prior to the change, the island used ZK2. Niue, which is about 1.5 times the size of Washington, DC, has a population of almost

600 people. Further information at:

Faites vous une idée en vous rendant sur _www.visitazores.com_ (http://www.visitazores.com/) .
Peu de gens savent que les Açores sont un archipel de neuf îles , toutes habitées, réparties sur 602 km d'est en ouest, entre les USA et l'Europe.
Peu savent aussi que les Açores ont leur propre ligne aérienne , la SATA, qui dessert chacune des îles en plus de nombreuses destinations en Europe et Amérique du Nord. Chaque île à ses propres caractéristiques , si variées qu' elles justifient votre visite à chacune d'entre elles.
Pour nous radios, tandis que le DXCC ne reconnaît qu'une seule entité Açores, le programme IOTA en reconnaît trois.
Lors de cette chasse unique aux 9 îles, la AZORES 9 ISLANDS HUNT, un groupe international d'opérateurs invités par les radioamateurs des Açores seront actifs depuis chacune de ces neuf îles, offrant l'opportunité de contacter les neuf préfixes CU1 à CU9 au cours d'un même week end.
Activité du Week end:
Du 29 septembre ,1200 UTC au 30 septembre 1200 UTC (24 heures).
Les stations démarreront dès qu'elles seront opérationnelles , certaines dès le vendredi 28 septembre.
Fréquences :

nombre correspondant de tickets de loterie dont le lot sera un voyage
gratuit aux Açores. (exemple 7 îles contactées = 7 tickets).
De plus les 25 premiers opérateurs qui auront contacté les 9 îles, seront
qualifiés pour une seconde loterie.
La gratuité des voyages s'entend du plus proche aéroport desservi par la
SATA, + le séjour et les transferts.
Pendant ou immédiatement après le week end les logs seront téléchargés sur
Clublog pour publication de vos slots bande/mode.

ALL NINE AZORES ISLANDS , CU1 THROUGH CU9, ACTIVATED AT ONCE

Are You Ready to Fly to Azores for Free by Making Nine QSOs?

Yes indeed, those of you willing to spend 24 hours or less on the radio
are eligible to participate in an Azores lottery for two all-paid packages to
the beautiful Azores Islands in the Atlantic , completely free of charge.
The project is organized by the Azores-Finland Friendship Consortium in
partnership with the Amateur Radio Associations of the Azores Islands and
supported by the Azores Promotion Agency (ATA) and Azorean Airlines (SATA). Just
look at <www.visitazores.com> and make up your mind.

Not many people know that the Azores consist of nine populated islands,
stretching over a distance of 602 km (305mi) from East to West, next to USA
and Europe . And it is not widely known that the Azores have their own
airline (SATA) flying to each island, in addition to many destinations in Europe
and North America . Each island has its own characteristics and its own
blend and alone qualifies for your visit there.

While these islands count for a single DXCC entity, they offer three (3) IOTA groupings.

With this unique AZORES 9 ISLANDS HUNT, an invited international group of amateur radio operators together with resident Azores amateurs will be activating the nine islands, offering an opportunity to the world to contact these islands all at once over one weekend.

ARLD033 ITU Assigns New Prefix for Niue: E6A-E6Z

On August 3, the ITU updated its Table of International Call Sign
Series to reflect a call sign change for Niue. The island will now
have the entire E6 prefix block. Niue -- an island approximately
1500 miles northeast of New Zealand -- is a self-governing island
nation that has been in free association with New Zealand since
1974. Prior to the change, the island used ZK2. According to the CIA
World Factbook, Niue is about 1.5 times the size of Washington, DC,
and has a population of almost 1300 people.

ALL NINE AZORES ISLANDS, CU1 THROUGH CU9, ACTIVATED AT ONCE

Are You Ready to Fly to Azores for Free by Making Nine QSOs?

Yes indeed, those of you willing to spend 24 hours or less on the radio are eligible to participate in an Azores lottery for two all-paid packages to the beautiful Azores Islands in the Atlantic, completely free of charge. The project is organized by the Azores-Finland Friendship Consortium in partnership with the Amateur Radio Associations of the Azores Islands and supported by the Azores Promotion Agency (ATA) and Azorean Airlines (SATA). Just look at <www.visitazores.com> and make up your mind.

Not many people know that the Azores consist of nine populated islands, stretching over a distance of 602 km (305mi) from East to West, next to USA and Europe. And it is not widely known that the Azores have their own airline (SATA) flying to each island, in addition to many destinations in Europe and North America. Each island has its own characteristics and its own blend and alone qualifies for your visit there. While these islands count for a single DXCC entity, they offer three (3) IOTA groupings.

With this unique AZORES 9 ISLANDS HUNT, an invited international group of amateur radio operators together with resident Azores amateurs will be activating the nine islands, offering an opportunity to the world to contact these islands all at once over one weekend.

Activity Weekend

Saturday, September 29, 1200 UTC to September 30, 1200 UTC (24 hours). These stations will be active starting Friday, September 28 as soon as they become operational.

Two Hunt Awards

Those making a QSO with at least 5 different islands will have a corresponding number of tickets placed into a lottery for a free trip to the Azores (e.g. if you have QSOs with 7 islands, you will get 7 lottery tickets). Additionally, the first 25 operators making QSOs with all 9 islands will be eligible for a second lottery. The free trips are from the closest airport served by SATA; including flight, accommodation and transfers..

During or immediately after the weekend, the logs will be posted on Club Log to display your band/mode slots. The lottery will be drawn on October 15, 2012.

QSL Cards

All QSOs will be confirmed through the bureau network with special full-color cards. Direct QSL requests via Jose Melo, CU2CE.

ARLD033 ITU Assigns New Prefix for Niue: E6A-E6Z

On August 3, the ITU updated its Table of International Call Sign Series to reflect a call sign change for Niue. The island will now have the entire E6 prefix block. Niue -- an island approximately 1500 miles northeast of New Zealand -- is a self-governing island nation that has been in free association with New Zealand since 1974. Prior to the change, the island used ZK2. According to the CIA World Factbook, Niue is about 1.5 times the size of Washington, DC, and has a population of almost 1300 people.

ARLX012 RAC Announces New Ontario Section Boundaries, Abbreviations

In March 2012, the Radio Amateurs of Canada (RAC) announced that it would split its Ontario Section into four new Sections "to create a management model that better communicates with, and represents the interests of, the overall Ontario amateur population." The new Section boundaries go into effect as of September 1, 2012.

On August 8, RAC Chief Field Services Officer Doug Mercer, VO1DTM/VO1DM, announced the new Section boundaries, names and abbreviations:

Ontario North (ONN): All of Northwest Ontario, including Manitoulin Island, Northeastern Manitoulin and the Islands, Killarney, the cities of Greater Sudbury and North Bay and Nipissing District.

Ontario East (ONE): Algonquin Park, Renfrew, Hastings, Prince Edward, Haliburton, Peterborough and Northhumberland Counties, and the cities and counties to the east.

Greater Toronto Area (GTA): The City of Toronto and the Regions of Halton (including the City of Burlington), Peel, York and Durham.

Ontario South (ONS): Parry Sound District, the counties of Simcoe, Grey, Bruce, Dufferin, Wellington, the City of Hamilton, the Region of Niagara and the remainder of Southwestern Ontario.

"I am also thrilled to advise that all four Section Manager positions have been filled," Mercer said. "I will circulate a formal introduction in the weeks to come."

This new change will affect ARRL contests and Field Day. Details may be found on the web at,
http://www.arrl.org/news/rac-announces-new-ontario-section-boundaries-abbreviations.

According to Mercer, several vendors of logging and contest software have also announced changes, but some will not be effective until January 2013. He advises to verify with the vendor well in advance of the upcoming contests.

ARLD033 ITU Assigns New Prefix for Niue: E6A-E6Z

On August 3, the ITU updated its Table of International Call Sign Series to
reflect a call sign change for Niue. The island will now have the entire E6
prefix block. Niue -- an island approximately 1500 miles northeast of New Zealand -- is a self-governing island nation that has been in free association
with New Zealand since 1974. Prior to the change, the island used ZK2. According
to the CIA World Factbook, Niue is about 1.5 times the size of Washington, DC,
and has a population of almost 1300 people.

ARLX012 RAC Announces New Ontario Section Boundaries, Abbreviations

In March 2012, the Radio Amateurs of Canada (RAC) announced that it would split
its Ontario Section into four new Sections "to create a management model that
better communicates with, and represents the interests of, the overall Ontario
amateur population." The new Section boundaries go into effect as of September
1, 2012.

On August 8, RAC Chief Field Services Officer Doug Mercer, VO1DTM/VO1DM, announced the new Section boundaries, names and abbreviations:

Ontario North (ONN): All of Northwest Ontario, including Manitoulin Island,
Northeastern Manitoulin and the Islands, Killarney, the cities of Greater Sudbury and North Bay and Nipissing District.

Ontario East (ONE): Algonquin Park, Renfrew, Hastings, Prince Edward, Haliburton, Peterborough and Northhumberland Counties, and the cities and counties to the east.

Greater Toronto Area (GTA): The City of Toronto and the Regions of Halton (including the City of Burlington), Peel, York and Durham.

Ontario South (ONS): Parry Sound District, the counties of Simcoe,
Grey, Bruce,
Dufferin, Wellington, the City of Hamilton, the Region of Niagara and the
remainder of Southwestern Ontario.

"I am also thrilled to advise that all four Section Manager positions
have been
filled," Mercer said. "I will circulate a formal introduction in the
weeks to
come."

This new change will affect ARRL contests and Field Day. Details may
be found
on the web at,
http://www.arrl.org/news/rac-announces-new-ontario-section-boundaries-abbreviati
ons.

According to Mercer, several vendors of logging and contest software
have also
announced changes, but some will not be effective until January 2013. He
advises to verify with the vendor well in advance of the upcoming
contests.

"You will see in the Project Description that we have developed a wide-ranging scientific program, including radio operations (the DXpedition), real-time communications, mountain science, biological science, atmospheric science, astronomical science, documentation, and educational outreach. We are proposing that the AAD collaborate on some of the research.
We are interested in establishing a collaboration with any person or group that can fit into the research program (or extend it). The next NEWS update will be on 15 September. The next round of team members will be announced on 15 October, but if you are interested in joining the team (on the island

or offsite), we invite you to contact us anytime."

PT0S & 6 METRES ---> The PT0S team will be making a special effort to put St. Peter and St. Paul Rocks on 6 metres during its 12-24 November operation. "We have experienced 50MHz operators", they say, "and will be taking high performance gear to effectively exploit openings. We'll operate on SSB and CW and an additional effort will be made for 6m EME, during the time when the moon is at the horizon". Please visit http://pt0s.com/ for further information.

QSL HK0NA ---> As of 8 August, all traditional direct requests received through 31 July (with appropriate return funds) and all OQRS direct requests received through 5 August have been processed and mailed - a grand total of 74,190 QSOs. "The QSL process has been temporarily 'paused' while we give all of our special QSL processors and handlers some time off", N2OO says. "We will re-start direct QSLing in early September, then start on the OQRS bureau requests soon after". The logs were uploaded to LoTW on 10 August, but some QSOs are missing. N2OO is aware of the problem and is workimg on this with ARRL.

QSL VU7M ---> The new address where to send direct cards for the current DXpedition to Minicoy Island (AS-106), Lakshadweeps [425DXN 1109] is: 9026 Phillip Dorsey Way, Columbia MD 21045, USA. This is just a mail drop, as the actual QSL cards will be mailed from India. Include a self addressed label (SAE non required) and at least two US dollars.

QSL YV7/UA9YAB & YV5/UA9YAB ---> The QSL cards for the late UA9YAB's operations from IOTA groups SA-012 (YV7/UA9YAB) and SA-035 (YV5/UA9YAB) will be handled by UA9YPS. QSL direct only to Aleksandr Y. Shishkin, ul. Kalinina 18-18, Rubtsovsk, Altajskij kr., 658213, Russia.

+ SILENT KEY + Aleksandr A. Vedernikov, UA9YAB (aka XU7AEQ and JT0YAB) died unexpectedly on 9 August during his vacation in Venezuela (YV7/UA9YAB and YV5/UA9YAB) [425DXN 1099]. He was only 50 years old, and leaves behind his wife Nataliya and two children. DX World.net has now set aside a dedicated page (http://dx-world.net/ua9yab-family/) for donations to be sent to help offset the high costs for returning Alex's body home.

QSLs received direct or through managers: 3B8CF, 3C0E, 3C6A, 3G7C (SA-018), 4S7AB, 4S7BRG, 5B8AD, 6O0CW, 6V7Z, 6Y5WJ, 9G5TT, 9J2KC, 9K2HN, 9L0W (AF-037), 9Y4HQ, A35CT, A52JY, A5A, C21XF, CO7EH, CO8LY, CO8ZZ, CX7CO, DP1POL, E51M, ER5A, ES3AX, ES9C, EY7AD, EZ8BP, F6ATS/6W, FG5LA, FJ/W6JKV, FK8CE, FW0NAR, GR100MGY, H44UD, HC2/KF6ZWD, HH4/W3CMP, HK0NA, HK1MW, HP1AVS, HV0A, J52HF, JD1BLY, JT1CO, JX5O, KH8/N9YU, KP4RV, KP4VP, N5K, NH0Z, OD5NH, OD5NJ, PJ5/SO6X, PJ7DX, PY0FF, S21YX, SA6G/7 (EU-137), SU9VB, SV2ASP/A, T32C, T32TX, T32XX, TA3X, TO5T, TX4T, UA9MA, UN3M, V73AX, V73NS, V85SS, VP2MFF, VP2MQR, VP2MSN, VP6T, VQ9JC, VR2KF, WE8A/KH0, XV9MA, XX9E, YB8Y (OC-221), YI9EO, ZD7XF, ZL2WL.

*QSL HOUSE CLEANING. Henryk, SM0JHF, reports, "I am retired now and can no longer afford sending all QSL cards automatically. I have in the past
50 years personally filled in and shipped more than 100k QSL cards for my activities using the following callsigns: SP5AHL (1960-1966), 3Z0L (1969), SP5PWK (1969-1974), SM0JHF (since 1978), SK0MT, SK0UX, K6JHF, C56JHF, S92JHF, D44CF, 9H3HF, F0HWF, VK2EHK, SV8/SM0JHF, TA0/SM0JHF, SM0JHF/HI3, SM0JHF/HI9, TK/SM0JHF, IS0/SM0JHF, 5B/SM0JHF, 6W/SM0JHF, VU3HKE and others." He will "clean house" and dispose of blank cards by the end of this year. If you need a card for any of the above call-signs, you need to contact him by E-mail: sm0jhf@...
He states, "Please do not send any QSL cards to me either direct or via any QSL bureau. I don't collect QSL cards and cards via bureau are destroyed at arrival. Send only a list, do not send any QSL cards, please."

Special Bulletin 13 ARLX013
From ARRL Headquarters
Newington CT August 21, 2012
To all radio amateurs

SB SPCL ARL ARLX013
ARLX013 QST Managing Editor Joel Kleinman, N1BKE (SK)

QST Managing Editor Joel P. Kleinman, N1BKE, of Meriden, Connecticut, died from injuries received during a house fire. He was 64. Kleinman was responsible for the coordination, organization, control and completion of all aspects of QST's editorial content each month. Kleinman's wife Jayne survived the fire, but is currently in the intensive care unit of a local hospital.

"Joel was obsessed with making QST the best Amateur Radio magazine it could be, but he pursued that obsession with uncommon dignity and kindness," said QST Editor Steve Ford, WB8IMY. "He was the quiet man behind the scenes, shouldering much of the burden that comes with creating 164 pages of new content every month. Joel set a high standard for all who may follow him."

After graduating from the University of Montana with a MA in Journalism, Kleinman came to ARRL's Club and Training Department in June 1976 to lead a program aimed at introducing students to space

science using Amateur Radio satellites. It was in this capacity that he contributed to the five-part series "Getting to Know OSCAR from the Ground Up" that was published in QST in 1977. Less than year later, Kleinman moved over to the ARRL's Production Department as an editorial assistant before becoming the ARRL Features Editor, then Editorial Supervisor, then Editorial/Production Supervisor. In 1988, he became Book Team Supervisor, where he was responsible for the development and editorial integrity of ARRL books and other media. He was named as QST Managing Editor in April 2001.

Kleinman was not licensed prior to beginning his career at ARRL Headquarters: "When I came on board, I didn't know much about ham radio," he remarked in a "Behind the Diamond" feature in the June 1979 issue of QST. "But it was made very clear to me that I soon would -- and I did!" Before long, Kleinman had written such QST articles as "The Lure of 2 Meters -- Part 1," the OSCAR articles and "Network Hams: A Hobby Becomes a Career," which focused on hams who worked at ABC, CBS and NBC: "It's not often that a person gets to go on behind-the-scenes tours of the headquarters of all three broadcast networks in two days."

"With the passing of Joel Kleinman, N1BKE, we have lost not only a respected professional colleague, but also a friend," said ARRL President Kay Craigie, N3KN. "The shocking circumstances of his death sharpen the sadness we feel. The ARRL sends our deepest sympathy to all of Joel's friends and family. I would like to thank the many amateurs who have expressed condolences through social media and by other means. Although you may not have known Joel personally, you feel his loss as a member of the extended Amateur Radio family. Your kindness and words of comfort are sincerely appreciated."

According to the Meriden Record-Journal, David Chester -- who lives across the street from the Kleinmans -- and about 20 others who were in his backyard at the time of the fire were the first responders to the blaze. "It was crazy," Chester told the newspaper. "Somebody smelled smoke, and most everyone went over there immediately." Others immediately ran into the house to save Jayne Kleinman. "Steve [one of Chester's friends] said he saw her legs and pulled on them," Chester said. "The other two grabbed her from her back, and together they brought her out onto the front lawn."

Meriden Assistant Fire Chief Mark Finnegan told the Record-Journal that the Meriden Fire Department received a call around 5:15 PM on August 18, reporting a fire on the second floor of the single-family home. The fire was contained to the second floor of the home, and was put out by firefighters within 10 minutes.

Firefighters were able to locate Joel Kleinman in a bedroom on the second floor and paramedics treated him at the scene, but he died later at a local hospital. "When they got to the top of the stairs, the guy told me they saw [Jayne's] foot and they grabbed her foot and

dragged her down the stairs," Meriden Fire Chief James Trainor told the Hartford Courant. "I guess they tried to go back in but it was untenable. There was so much smoke he just couldn't make it." Trainor said that the fire was in an upstairs room and may have been burning for a while before rescuers arrived.

"Joel was a gifted writer and editor," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Amateur Radio is the richer today because he chose to devote his talents to the work of the ARRL."

Kleinman was a former president of the Newington Amateur Radio League (NARL) and a member of the Quarter Century Wireless Association (QCWA). Funeral arrangements are pending.

The ARRL is collecting condolence messages to forward on to Joel's family. If you would like send a message, please email it to, news@....

Sincerest condolences to Joel's family and friends.

Until next time, enjoy the chase, but HAVE FUN ! !

73,
Carl, N4AA

A61BK, Khalid, has decided to manage his own cards. As of August 20^th , all cards for Khalid should now go *_direct to him_* at his new QRZ.com address. Buzz, NI5DX, will no longer be confirming any cards for A61BK, however he will answer any A61BK cards that arrive in the next bureau shipment to NI5DX. After this shipment, no A61BK cards will be confirmed via the bureau either.

Effective immediately, NI5DX will also no longer be answering requests for any of the special event calls (A60HD, A60A, A60JJ, A60ITU, A60WARD, and A60DWC). Please check QRZ.com to see the QSL route.

30 August 2012
News from E51AND Palmerston Atoll -
This is not a DXpedition - I am stranded on the Atoll until a ship comes. Possibly 16 or 17th September. I have minimal equipment with me and there are no stores or supplies on island so it is "make do with what we have!".
Operating using a solar charged battery power FT857D into a Snowdonia Radio Co. SRCX80 5m vertical. CW is hand key and paper logging in a school exercise book. Life on island is COMPLETELY different from anything one might experience in the US or Europe and operating is interrupted by things like the battery being used to pump water, the social demands of my host family, a visit from the island secretary...
I'm not a DXer and not skilled at operating pile ups - please be patient with me. On CW please QRS to <8wpm if you want me to respond - demonstrating your CW prowess will guarantee that I won't be able to copy you. I work only the QRS stations.
I'm sure that my sudden disaapearance from a pile up, or my amateurish operating procedures are frustrating to some - but I'm doing the best I can to work as many people as possible - I know it has been a decade since OC124 was active. Please be patient :-) Thanks. Andy [DX World]

Radio Amateurs of Canada

>From the Desk of Ontario Section Manager
Attn: All Ontario Amateurs
MESSAGE TO ALL AMATEURS - THANK YOU FOR YOUR SUPPORT & WELCOME TO THE NEW ONTARIO RESTRUCTURE

As you are aware changes have been made and now are ready to launch September 01, 2012 here in Ontario on behalf of the Radio Amateurs of Canada in relation to the Ontario Field Services. In the past Ontario has been served by one elected official of fields services that being the Ontario Section Manager. For the last 7 years I have had the honor and pleasure to be elected and serve as your Ontario representative for Field Services on behalf of RAC. This position brought responsibilities of overseeing the field services in Ontario including ARES, the NTS, Official Bulletin Service and the Official Observer Service. I have had the opportunity to work with many wonderful and knowledgeable amateurs in these services and the wealth of experience in the province is second to none. However I also have been around long enough to realize that one person and one person alone cannot do justice to the job it disserves. I know that during my time I have spent relentless hours on e-mails and discussing issues with many amateurs over the phone. In realailty these concerns should be addressed face to face. I am a firm believer that for RAC to flourish in the future you need to have personal, interaction with your RAC official. Living in Northern Ontario and working full time I did not have the luxury to visit many clubs or ARES groups. I have met many of you at flea markets and meetings but you need to have there ability to contact your RAC Official when you need him/her. This is why I am excited about the new restructuring proposal undertaking by RAC. With three more additional Section Managers in the province representing their section of the province there is the opportunity to get more interaction. Each Section having a coordinator for the field services will only work better and represent all of you and make RAC stronger as a national organization. One of my last duties as Ontario Section Manager is to welcome the three additional members to the Ontario Team.

* Section Manager Ontario South Ian Snow VA3QT - ONS
* Section Manager GTA George Duffield VE3WKJ - GTA
* Section Manager Ontario East Michael Hickey VE3IPC - ONE

I know these three experienced amateurs will serve the amateur community well and I look forward to the new direction Ontario is taking and working with these fine gentlemen. Having served as Section Manager for all of Ontario for the past 7 years I want to take this opportunity to thank all of you that have supported me and my field services members over the years. Your commitment to the program

has been proven many times over. I look forward to serving the members of Northern Ontario as your Section Manager for Ontario North - ONN. As always I am open to any questions or concerns that you may have. Please feel free to contact me at anytime. I look forward to this new process and the exciting times ahead for field services and RAC.
Yours Truly

Due to all the rising costs incurred over the past Five years or so, I am finally having to raise the price on the RAC call book to make it a break even sale.
The new pricing will start with the Winter 2012 release late in November 2012.
Here is the breakdown

DC Code of Conduct September Newsletter

/**/

I am pleased to report that our second objective has been achieved, to get DXpeditions to ally with us with a common objective of increasing ethical conduct. All of the DXpeditions are pleased to tell the world that they support the DX Code of Conduct. They all link to our website. We post them on our DXpeditions page.
http://dx-code.org/DXendorse.html

I am also encouraged by the fact that many do so as they assemble their website. It's already up when I hear about it. I don't even have to ask. We are all pleased that those guys, whom we are trying to benefit, all seem to quite pleased at our effort. I have also heard from some returning DXpeditions that they think that we are making a difference. Great news!

We continue to get new visitors to our website. Every time I check in and click on the globe at the bottom of the 2nd page, I find that 3 or 4 others who are also be in the site at the same time. I am not about to fool myself and think that we are QRZ.COM or something like that. But it is clear that we have achieved our goal of having our mission universally recognized in the ham community. I believe that all active HF operators are aware of the Code.

I am sad to report that our "shop" has not been successful. It turns out that almost no one 0seems to want a DX Code T-shirt or coffee mug. I own them and like them. It doesn't hurt to keep it open but I would have thought that there would be more interest among our community of subscribers - YOU. So check it out.
http://shop.cafepress.com/dx-code-of-conductand imagine how handsome you would look in that T-shirt!

I have good news to report. Maybe you don't know that Dr. Spock is an avid DXer and is a supporter of ethical operating practices. Hear what he has to say. Click on his image to go to our website and click again to watch his video. We may have found our new spokesperson. Thanks to NZ3M for this invaluable contribution. Perhaps we will hear more from him in the future. CLICK HERE

//

//

Finally, our next goal is to get your national society to support the Code publicly and put a link at their website. DARC and RSGB have joined us in promoting it but for U.S. hams, I continue to be embarrassed that the ARRL is still just ignoring our existence. Take a minute to write or e-mail to your Section and Division Leaders and the management at Newington.

For our supporters in other countries, urge your leaders to join us in supporting the program. All of us have a duty to be sure that the next generation of operators learn how to operate ethically and responsibly.

There are lots of DXpeditions in the Pacific coming up very soon. They ought to be a lot of fun and they are all well run professional teams that endorse the Code. Let's hope that the pileups are orderly.

/**/

//

//

Thanks for all your support. It invigorates the team. You might consider forwarding this to your ham friends, like members of your club.

73,

Randy W6SJ

Clipperton Island 2013
Sunday Sep 02, 2012
tags: Clipperton, Cordell Expedition

Fresh news update – interested in joining?

Bob KK6EK reports that the March 2013 Clipperton Island DXpedition is in the final stages of assembling the team. Currently there are several openings to join the project, and the team is soliciting any operators with some form of DXpedition experience to join them. You can see the current team at the DXpedition website.

A complete description of the project, including information for participants, is posted on the website. Click DOCUMENTS on the splash page and download the PDF file. There you will find information about the project, including the cost to participants. If you are interested in joining the team, it is advisable to contact them immediately. You can do so by contacting the organizers Bob KK6EK [at] cordell.org or Chris [at] dl1mgb.

Note that the Clipperton DXpedition will make use of DXA, the system for displaying QSOs on the DXA web page within 60 seconds after they are logged. Additional technology that will be used on Clipperton is being developed for use on Heard Island in January, 2014.

The Clipperton DXpedition is also assembling an offsite team, including pilots or regional coordinators, and people to help develop capabilities for software defined radio (SDR). If you are interested in participating in that team, please contact the expedition leaders.

Finally a number of scientific projects are being planned for the expedition, and inquiries are invited in that area.

PRESS RELEASE

September 5, 2012

DXERS TAKING A NEW COURSE IN AZORES, SEPTEMBER 28-30, 2012

NEW WEBSITE GOES LIVE http://azores-islands-hunt.com/

It is often said that DXers only work DX. More recently, we have seen a healthy shift toward assisting the society they visit by helping locals become stronger in Amateur Radio. Something totally new is now happening in the CU-land – the Azores.

In recent years, the Azores Islands have balanced their agriculture and livestock sectors through increased awareness of their great location and unique landscape facilitated by the development of the local infrastructure to receive more visitors from industrialized countries. Significant progress has been made in expanding tourist facilities, convention hotels and holiday resorts. The Azores is now capable of accommodating 10,500 visitors per day. Additionally, the Azorean airline (SATA) is set to serve many European destinations in addition to the US and Canada.

Radio amateurs are now stepping forward to help the Azoreans increase the awareness of all of their nine islands, all within reach of SATA airline service. Forming nine country teams with the locals, a total of twenty DXers will fly in from SATA destinations to be on the air from the nine islands as part of the “Azores Nine Islands Hunt” - a unique concept to bring everyone on board globally to share what the Azores can offer. Those participating are:

K2DO, KI1U, KE3Q, N2GA, VE3DZ, VE3FWA, DJ9ZB, DF9TF, G3TXF, G7VJR, OH2BH, OH8NC, OH9MDV LB3HC, ON7LX ON7TK, ON5NT, OZ7AM and OZ1IKY together with locals: CU1AAD, CU2BV, CU2CE, CU2DX, CU3CS, CU4AB, CU5AM, CU6AB, CU7CA,CU8AAE and CU9AC

The Amateur Radio group is also set to streamline emergency communications procedures throughout the archipelago. Together with the local amateur population and administrators, they will be using this activity to test the island-to-island amateur radio network. The ARRL is sending their best resources, lending their expertise in this field.

The project website was launched today at http://azores-islands-hunt.com/ for your review while you can also study the Azores at http://www.visitazores.com/en

11139. News from QRZ-DX

I guess most DXes are tweaking their amps, etc. in preparation for NH8S which should be on the air tomorrow, according to the latest updates. Good luck to all…
One note on NH8S for those interested in 60 meters. San, K5YY is the Pilot Station for 60 meters from NH8S and he released the following on Tuesday….
“Joe will try to get on 60m after NH8S has been on a few days and things “settle down” ... Do not expect him on before Sept 9th or 10th. Please do NOT email me! I will email the entire group AFTER I hear from Joe via the personal island email system. I do NOT set up schedules. I may not hear from Joe until another 5-6 days. As announcements have said, he will look for Europe at about 0400Z and North America from about 0900-1100Z during USA sunrises. Again, do NOT email me. You will know what I know when Joe tells me.”

John, N7CQQ and Ron, N6XT were at Western Samoa on Monday and had applied for a license there. John reported, We bought Western Samoa licenses 5W0QQ for myself and 5W0XT for Ron. We might operate a bit the next few days. We depart for Tokelau on Thursday and hope to get a license there.

Good luck with all, enjoy the chase, but HAVE FUN !!

Carl, N4AA

PRESS RELEASE
September 5, 2012

DXERS TAKING A NEW COURSE IN AZORES, SEPTEMBER 28-30, 2012

NEW WEBSITE GOES LIVE http://azores-islands-hunt.com/

It is often said that DXers only work DX. More recently, we have seen a healthy shift toward assisting the society they visit by helping locals become stronger in Amateur Radio. Something totally new is now happening in the Azores, CU-land.

In recent years, the Azores Islands have balanced their agriculture and livestock sectors through increased awareness of their great location and unique landscape facilitated by the development of the local infrastructure to receive more visitors from industrialized countries. Significant progress has been made in expanding tourism facilities, convention hotels and holiday resorts. The Azores are now capable of accommodating 10,500 visitors per day. Additionally, the Azorean airline (SATA) is set to serve many European destinations in addition to the US and Canada.

Radio amateurs are now stepping forward to help the Azoreans increase awareness of all their nine islands being within reach of SATA airline service. Forming nine country teams with the locals, a total of twenty DXers will fly in from SATA destinations to be on the air from the nine islands as part of the "Azores Nine Islands Hunt" - a unique concept to bring everyone on board globally to share what the Azores can offer.

United States: K2DO (YL), KI1U, KE3Q, N2GA

Canada: VE3DZ, VE3FWA

Germany: DJ9ZB, DF9TF

United Kingdom: G3TXF, G7VJR

Finland: OH2BH, OH8NC, OH9MDV

Norway: LB3HC

together with local hams from each island:

CU1AAD, CU2BV, CU2CE, CU2DX, CU3CS,

CU4AB, CU5AM, CU6AB, CU7CA,

CU8AAE and CU9AC

Additionally, the Amateur Radio group is set to streamline emergency communications options throughout the archipelago together with the local amateur population and administrators and will be using this activity to test the structural island-to-island amateur radio network. The ARRL is sending their best resources to lend their expertise in this field.

The project website is launched today at <http://azores-islands-hunt.com/> for your review while you can also study the Azores at <http://www.vistazores.com>. [VE3DZ]

There is now a beacon on 50.107 sending “de NH8S NH8S BCN.” RTTY
activity is now reported on 30, 20, 17 and 10. Also, for 60 meter
followers you might want to listen on 5403.5 around 0900 for NH8S as
well as John, 5W0QQ &/or Ron, 5W0XT.

3D2C - Conway Reef - Press Release #3

It is with great excitement, that we announce that our preparations for a large multi-national Dxpedition to Conway Reef are going according to plan. We now have 19 operators from all over the globe to participate in this tent and generator operation.

Conway Reef is located in the South Pacific Ocean and is #35 on Club Log's most wanted DXCC list.

The bulk of our equipment has arrived and is staged in Suva, Fiji. ICOM is shipping the IC-7600 rigs to us this week, which will travel with the team to Suva. Our advance team is arriving in Suva on September 21 to commence with equipment testing and loading on our vessel, the venerable Island Dancer II.

The main Team is meeting in Lami Bay, Suva and departing by ship to Conway Reef on September 24th. The Team expects to arrive at Conway Reef and become active on September 26th. We will complete our Dxpedition on October 5th, 2012 and return to Suva.

The main goals of this DXpedition are to work every amateur radio operator who needs Conway Reef for a new DXCC country. In addition, we will be active on all bands from 1.8 MHz to 144 MHz, including the 5MHz and 50 MHz bands.

We will be active on CW, SSB and RTTY. Special attention will be made to work far away stations such as Europe and Africa during those periods when propagation permits. The propagation window for EU and Africa is very brief at times and signals may be weak, so we ask everyone in the honored HAM SPIRIT to stand by when asked so that we may fulfill this need. Our destination will have a wide range of options and possibilities.

We will use our Satellite phones to upload our logs on a daily basis to our on-line log. We will upload to LOTW approximately six months following the DXpedition.

Our team consists of these Operators: Hrane-YT1AD-Leader, Aleksej-UA4HOX-Co-Leader-Operations, Paul-N6PSE-Co-Leader-PR & Fundraising, David-WD5COV, Vasily-RW4NW, David-AH6HY, Alan-K6SRZ-Team Physician, Alan-AD6E, Sergej-RZ3FW, Craig-K9CT, Stan-LZ1GC, George-N6NKT, Peter-PY5CC, Mike-K6MKF, Jim-K9JM, Miguel-PY3MM, Luciano-PY5KD, Dragan-YT3W and Tevita-3D2TR.

Our Pilot Stations are: Aca-YU1AA, Toma-YU1AB and Andre-V51B.

We wish everyone good propagation and we hope that you enjoy working the 3D2C Team.

We are very grateful to INDEXA, NCDXF and all of the Clubs and individuals who have provided monetary support for this Dxpedition. We sincerely hope we can satisfy your needs!

At this time, we are seeking additional Club and Individual Sponsors to help us defray the costs of carrying out this DXpedition. Donations can be made via the 3D2C web page. OQRS will be available upon completion of the Dxpedition.

Both of them live and work in Juba. Jim will be back home on 25 September, he will return to Juba around late October or early November. "Once I am set up and operating", he says, "I plan on being highly active, and will be on just about everyday". For the time being, he can use Diya's station.
ZD9 - Weather permitting, Martin G3ZAY and Rob M0VFC should arrive on Tristan da Cunha [425DXN 1113] around 27 September, and be active as ZD9UW until 4 October. Their main goal is "to allow as many people as possible to get ZD9 in their log at least once, rather than concentrating on those aiming to work us on multiple slots". They expect to be QRV on 80-10 metres CW (Martin) and SSB (Rob), with some RTTY if time and pile-ups permit. There's unlikely to be time for 160m operation ("we can probably give more people the chance to work us on the higher bands"), but they will have a small 6m antenna and will be operational if the band is reasonably open. QSL via OQRS on Club Log (for both direct and bureau cards); traditional direct cards should be sent to M0VFC. Further information, including how to help the Tristan da Cunha Educational Trust Fund and receive a direct QSL card from the island, can be found at www.zd9uw.org.uk. [TNX G3ZAY]

*Hello DXers:
The following email just arrived from San, K5YY. You can see from it that the Team on Swains Island is having a terrible time continuing the operation. It's obvious that they are barely able to function for another day or so.
I ask that you be considerate of the conditions they are operating under and use your best behavior. There has been far too much profanity and poor operating habits exhibited, especially last night on 15 RTTY.
Thanks for your consideration.

73,
Carl, N4AA

Joe emailed today.
Conditions NOT good, S9 QRN on 60m. May try tomorrow Z at announced times of 0900 to 1100Z but it does NOT look good at this time. Also, much bad weather conditions , antennas down, operators sick and tired and dehydrated and with some wounds requiring medical care. Team will likely start breaking down stations on Sunday for a possible early departure from Swaims. So, if you listen on 60m, try tomorrow at USA sunrise times or perhaps earlier like 0900Z. Nothing guaranteed and conditions receive-wide are horrible on 60m. Situation does not look for a big effort on 60m and maybe tomorrow will be only attempt before going QRT. 5W0QQ also reports to me that conditions S9 QRM today, and barely heard one station on 60m..
Please monitor my posts on DXWorld.com and click link to 60m Log. This is the Chat Room and needs to be monitored more often. Also keep monitoring the NH8S website for late information.
Sorry I do not have better news for the 60m gang, but Joe has been making an effort to try and get on 60m during all other hectic situations going on there. Again, an early QRT is expected. Conditions not good for the operators.

Monday, September 10, 2012 marked the end of supervised independence of the Republic of Kosovo, a European country with a population of 2 million, and the beginning of its status as a fully sovereign state. The ceremonies featured a keynote address by a former UN Envoy for Kosovo, President Martti Ahtisaari of Finland, an architect of the March 26, 2007 Comprehensive Proposal for the Kosovo Status Settlement which now came to its completion. In his speech at Monday's special session of the Kosovo Parliament, President Ahtisaari stated: “Five years ago I offered to the Secretary-General of the United Nations a blueprint for a sovereign, multi-ethnic democracy called Kosovo. Today we celebrate the full and final adoption of the principles and structures of that blueprint into the institutions, the processes, and the legal framework of an independent, functioning state." Pursuant to the Settlement Proposal, an International Steering Group (ISG) - consisting of twenty-five countries - was formed to oversee and guide the development of good governance, multi-ethnicity and rule of law in Kosovo. The ISG has now completed its duties, allowing Kosovo to continue with full sovereignty and the management of its own affairs as a member of the world community. This is now the overall state of affairs regarding of Kosovo's formal status, which enables the country to pursue its chosen course independently into the future. Kosovo is now an independent country, which must be honored as such. As of today, a total of 91 countries, including most of the industrialized world, such as USA, Japan, Germany, the United Kingdom and France along with the Benelux and Nordic countries, have recognized the Republic of Kosovo. These powers have endorsed the final settlement, the fulfilment of which is now celebrated in Kosovo's capital Prishtina. An Amateur Radio working group headed by IARU Region 1 President Hans Blondeel Timmerman, PB2T and including IARU Region 1 Executive Committee Member Nikola Percin, 9A5W and Mission Goodwill Kosovo Coordinator Martti Laine, OH2BH together with their associates are in the final stages of assisting Kosovo’s Telecom Authorities in drafting regulations governing Amateur Radio in Kosovo, to bring the original Kosovar operators and their re-vitalized Amateur Radio Association back to the international community.

Republic of Kosovo "on air" soon: The supervised independence of Kosovo ended on Sep 10. Kosovo has two million inhabitants and the capital is Pristina. international law.

Electronic journals online: Old electronic journals including the QST have been put online:http://www.rsp-italy.it/Electronics/Magazines

DARC performance diplomas and DARC Contest Logbook (DCL) popular abroad: Foreign radio amateurs are increasingly using the excellent opportunities for easy
application of the German DARC performance diplomas using the DARC Contest Logbook and are particularly fond of the combination of the DCL with LotW and eQSL.
VE3FWA thanks DF8AA, manager of the WAE award, with following words: "Some remarks on the DCL. What you have created here is incredible. No-one but the DARC can connect eQSL, LotW and Contestlog to apply for diplomas. Really great! It is also a pleasure to use. Otherwise I would have not been able to collect all the
necessary QSL cards for the DARC
awards. Thank you for setting up this system. 73! Ed, VE3FWA"
In his "SV5DKL amateur radio blog" SV5DKL even presents his recently received EU-DX-D 1000
Trophy, his Europe RTTY Diploma (EURD) and other
DARC awards that he could apply for only by using the DCL. This is not
only a good achievement but also proof to the excellent acceptance of
the DARC Contest Logbook.
See:http://sv5dkl.blogspot.de/2012_08_01_archive.html
This might be also an additional motivation for award collectors to participate in a contest since many logs are uploaded to the DCL as well. As a result the
application of awards is very much simplified.
The DARC Contest Logbook can be found at:http://www.dxhf.darc.de/~dcl

E40VB QSL status: The E40VB QSLs were mailed on Sep 13. Documentation was sent to the ARRL by the end of July but DXCC approval is still pending.

If you are interested to join please send an e-mail to:Banaba@...

BITS & PIECES -

Western Kiribati T30PY/T30SIX -

We are working on the last minute logistic issues as well as on final preparation of our operation.

Although Air Pacific has changed our flight schedule multiple times, we are confident that we can keep up with the announced schedule.

The first station should be on the air in the first GMT hours of October 16th. Then we will gradually have all 4 stations running.

The quality and even the availability of local Internet need to be confirmed. Our goal is to upload logs in Clublog daily as well as send news to the community periodically. The current DXpeditions in the Pacific area give us additional information about the likely local propagation behavior on HF.

We emphasize that we plan to have Low Band stations in every SR/SS as well as the 6m station on EME on every MR/MS. We are grateful for the support received from many individuals, clubs and companies. Support is key for the success of this enterprise.

YB - Indonesia -
To commemorate one year anniversary of YB Land DX Club, a special short term certificate of merit will be issued for contacting YBDXC members as well as other amateurs from YB land between 13 September and 31 October 2012. Full information can be found at: www.ybdxc.net/ [DXAT]

Z60K - The Republic of Kosovo now on air -
Sept 20 - Jim Weaver - K8JE, ARRL Great Lakes Director on Z60K activity:
"Of interest to DXers is the current operation from Kosovo - Z60K. I want to ensure that everyone interested in QSOing this activity understands it does not qualify for DXCC credit. This is because Kosovo is neither a member of the United Nations nor does it have an ITU-issued call sign block. At this time, Kosovo does not meet the established requirements of the DXCC program."

ZD9UW - Tristan Da Cunha -
UPDATE:
Some bad news unfortunately: Martin, G3ZAY, has been forced to cancel his

onward journey from Cape Town to Tristan. Rob, M0VFC, will still continue, and be active as ZD9UW. This means that it's now a single operator activation, and will concentrate primarily on SSB with some RTTY. Further info at: http://zd9uw.org.uk/

T33 - An expedition to Banaba Island (OC-018) under the callsign T33A is being organized by W2IJ and N1EMC. Plans are to depart Tarawa (T30) on 25 March 2013 and return on 10 April, with about 12 days on Banaba. Activity will be on 160-10 metres CW, SSB and RTTY with six stations and 14 operators. Current team members include AA4FL, DK1II, EA1IR, KD6XH, N1EMC, N6HC, N7CQQ, N9NS, W2IJ, W6KK and W8AEF; three more experienced DXpeditioners are being sought. If willing to join the group. email Banaba[@]T33A.com
TA - The TC Special Wireless Activity Team (www.tcswat.org) and the Giresun Radio Amateurs and Nature Sports Club will be active as TC2ZLH from Zonguldak Lighthouse on 29-30 September. QSL via TA1HZ.
W - Wayne, K9YNF reports he will be active as K9YNF/4 from Bogue Banks (NA-112) on 21-26 October. Look for him around 14260 and 18128 kHz SSB and 14070.15 and 7035 PSK31. QSL to K9YNF.
YB - Joppy, YB8XM has plans to be QRV from Babar Island (OC-271, new one for IOTA) starting on 2 November for six days [425DXN 1113]. Shu, JN6RZM (jn6rzm[@]nifty.com) is collecting donations by Paypal to purchase a better antenna for him. [TNX JN6RZM]

He will concentrate primarily on SSB with some RTTY. This is now a single operator activation: the goal is still to enable as many people as possible to work ZD9 for the first time, so the number of bands he can activate will be limited (mostly on the higher bands).
ZL7 - Hiro, JF1OCQ reports he will be active as ZL7A from the Chatham Islands (OC-038) on 1-9 November. He will operate CW, SSB and digital modes on 80-6 metres, with an emphasis on 80 and 6m (beacon on 50117 kHz). QSL via home call, direct or bureau (e-mail requests for bureau card to jf1ocq[@]arrl.net), and LoTW.

Congratulations to the team which helped to reintroduce Amateur Radio
to Kosovo, and welcome back to the airwaves to the returning Hams.

As of this time Z6ØK, and/or any other Z6 station, will not count for
any entity for DXCC awards purposes as they do not qualify under the
DXCC rules. Any future change in Kosovo’s DXCC status will be
announced by ARRL.

Sad news from Addis Ababa – Sid ET3SID passed away yesterday evening.

Instrumental in setting up the ET3AA club station and helping young
operators to become licensed, Sid will be missed.

Amente VA3AXB on behalf of all the club members and students at ET3AA
and EARS <http://et3aa.com/> released the following news:

I am saddened to announce that Sid May (ET3SID/ AB3OZ /G4CTQ) has
passed away. It came as a shock to his family and to all us at
ET3AA. As I heard from his family over the phone, he spent the day
at ET3AA as usual and it all happened later at night when he
returned to his house. Sid was having health problems and was
expecting to return to UK shortly on a doctor’s appointment. He
was a teacher, a mentor and a father to all of us at ET3AA. We
feel very saddened about the news and extend our condolences to
his family and wish for his soul to rest in peace.

Ethiopian Amateur Radio Society Chairman Sid T. May, ET3SID (SK)

Ethiopian Amateur Radio Society (EARS) Chairman Sid T. May, ET3SID/G4CTQ/AB3OZ, passed away September 25. In 1993, May established ET3AA, the first Amateur Radio club in Ethiopia. According to Hailemelekot Negussie, AB3OX, of EARS, May has taught Amateur Radio licensing classes in Ethiopia for more than 15 years. EARS is Ethiopia's IARU Member-Society.
An accredited ARRL Volunteer Examiner (VE), May administered the FCC license exam to prospective Ethiopian hams. He took part in administering an FCC exam session in December 2011 where more than 50 Ethiopians received US call signs; May gave his last exam session on September 10, with 18 sitting for the exam. Due to Ethiopian law, it is nearly impossible for Ethiopians to get an

Ethiopian Amateur Radio license. "Unfortunately, Ethiopian Security still controls the licensing system," said IARU Region 1 President Hans Blondeel Timmerman, PB2T. "I am afraid that more work has to be done to convince the authorities that today's students are tomorrow's leaders and that in principle, they are good Ethiopians who deserve their government's confidence. Another hurdle to overcome is the examination fee of 25 British pounds, a one month's salary in Ethiopia."
According to May's QSL card, May was primarily a RTTY operator. He held call signs in Zambia (9J2ED), St Kitts (VP2KH), Montserrat (VP2MKH), Oman (AX4JB), Nigeria (5N0SID), Gibraltar (ZB2HL) and Sudan (G4CTQ/ST2). He is a member of the Radio Society of Great Britain (RSGB) and in 1973, helped found the St Kitts Nevis and Anguilla Radio Society (SNARS). He founded EARS in the 1990s.
"Sid was a teacher, a mentor and a father to all of us at ET3AA," Negussie explained. "We feel very saddened about the news, and extend our condolences to his family and wish for his soul to rest in peace. Sid is survived by hundreds of ambitious radio hams and engineers who will forever be inspired by his humbleness and vision." [ARRL]

IARU Region 3 Chairman Michael Owen, VK3KI (SK)

IARU Region 3 Chairman Michael Owen, VK3KI, passed away September 22. He was 75. Owen, who was also President of the Wireless Institute of Australia (WIA) -- that country's IARU Member-Society -- participated in many IARU committees and was a member of the IARU Observer Team at a number of World Radiocommunication Conferences. He is perhaps best remembered for his work on Article 25 -- a package of revisions to the international Radio Regulations that are specific to the Amateur and Amateur-Satellite Services -- at WRC-03.
Amateur Radio societies around the world have benefited from Owen's enthusiasm and experience; he was passionately involved with the Amateur Radio Service since the 1960s, and served as IARU Vice President from 1989-1999.
In 2004, Owen led the WIA through the progression from a federal structure with state divisions, to an efficient national organization with affiliated local clubs. Through Owen, the WIA became highly regarded by government agencies and the Australian Communications and Media Authority (ACMA) for its professionalism and efficiency, especially in relation to the WIA examination and call sign management service. He championed and guided the introduction of the Foundation License class in Australia, a move which bolstered the numbers of Australian radio amateurs, while other countries' numbers were declining.
WIA Vice President Phil Wait, VK2ASD, has assumed the role of WIA President. Wait has served as a WIA Director since 2003 and was appointed in WIA Vice President in 2010.
Owen is survived by his wife Nan, who accompanied him on many Amateur Radio occasions -- most recently at the WIA National Convention in Mildura -- and two daughters. A funeral service is scheduled for 10:30 AM on Friday, September 28 at St Andrews Anglican Church in Brighton, Victoria. [ARRL]

YT2A - Silent Key

Message from Radio Sekcija Kozara, YU1AAV:
Today (26 September) in Belgrade our friend Goran YT2A died in an airplane

accident. He was doing daily activity as a test pilot. His colleague ejected from the plane while Goran stayed inside to sacrifice himself - not hitting houses and people. He saved many lives.
Goran will be remembered as a great man, great radio operator and YUFF and IOTA activator.
Rest in peace my friend, we will never forget you. [DX World]

CLUB LOG OQRS ---> "There has been an update to Club Log which may prove useful to international expedition teams (outside NA) who want to receive OQRS payments in their home currency", Michael G7VJR says. From 23 September 2012, Club Log OQRS has support for US Dollars (USD), GB Pounds (GBP), Euros (EUR), Australian Dollars (AUD) and Japanese Yen (JPY), thus

removing the overheads for expeditions who use these currencies. "In future, when you request a card from Club Log, you might be asked to pay in one of the currencies above instead of dollars. Don't forget that PayPal will show you how much you're paying in your own currency before you send funds overseas".

DXCC NEWS ---> "Congratulations to the team which helped to reintroduce Amateur Radio to Kosovo, and welcome back to the airwaves to the returning Hams. As of this time Z60K, and/or any other Z6 station, will not count for any entity for DXCC awards purposes as they do not qualify under the DXCC rules. Any future change in Kosovo's DXCC status will be announced by ARRL". [TNX NC1L]

+ SILENT KEYS + Michael Owen, VK3KI passed away on 22 September, at 75 years of age. He was IARU Region 3 Chairman and President of the Wireless Institute of Australia (WIA), and he also served as IARU Vice President from 1989-1999.
Sid T. May, ET3SID, Chairman of the Ethiopian Amateur Radio Society (EARS), passed away on 25 September. An electrical engineer, Sid established the first Ethiopian radio club in 1993. The club station ET3AA was enjoyed by many different elementary schools before it was moved to its current location, the Institute of Technology at the Addis Ababa University. Sid taught Amateur Radio licensing classes in Ethiopia for more than 15 years. He administered RSGB and ARRL license exams sessions, and got more than 120 students pass the examination.
Thirty-nine-year-old Maj. Goran Savic, YT2A (YZ1SG) lost his life on 26 September, when a Serbian military aircraft on a training flight crashed into a residential area northwest of Belgrade. If there were no causalities among the residents, it is because he made an effort not to hit buildings until the very last moment before ejecting.

As a reminder,permit me to say that this "personnage" was a former
president of the Provins ARC F6KOP, who was convinced of burglary and
theft against our Club.
He thefted last year for more than 25000 $ of equipment and some parts
had been solded by him and his wife when the Police arrested im at his
home.
The most part of the F6KOP equipment, which wasn't resold, was found
by the policemen, at his home.
Some parts at another Ham home, this ham he had resold some material
thefted.
It is still under the control of the French Justice .
He was condemned to pay heavy fines. Damage interests due to F6KOP and
to the person to whom he had resold of the stolen equipment) is not
still adjusted.

Finally he is under the blow of a punishment of many years' testing.
He can go to FH only why Mayotte is a French overseas department.
These are just some character traits of the man who signs "Sam".
Just for your information,

Please give the maximum publicity to the following: Phil, G3SWH and Jim, G3RTE will be active from Honiara, Guadalcanal in the Solomon Islands from the 18th to the 28th February 2013. The Solomon Islands are located in CQ zone 28, ITU zone 51. Guadalcanal counts as OC-047 for IOTA purposes. The "most wanted" data provided by Clublog currently shows the Solomon Islands at #81 in Europe and #77 in North America. Our activity will be on CW only on all bands 80-10 meters. There will be no 160, 60, 6 metres or EME activity. Propagation permitting, we plan to have two stations on the air for as many hours every day as is possible. Our main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs. QSL via G3SWH, either via the OQRS facility on Phil's web site http://www.g3swh.org.uk (recommended), direct with SAE and adequate return postage or via the traditional bureau route. There is more information at www.g3swh.org.uk/h44kw.html which will be updated from time to time 73 for now and TIA Phil Whitchurch G3SWH and AD5YS www.g3swh.org.uk Work is the curse of the drinking classes.

11207. Fwd: [DX-IS] Campbell Island set to drop down most-wanted list

Campbell Island set to drop down most-wanted list

Campbell Island will soon drop down the charts as many, many Radio Hams work *ZL9HR* between November 28th. and December 9th.

Campbell Island is at IOTA OC-037 600Km south of New Zealand in the the Great Southern Ocean.

While the equipment makes its way down to New Zealand, I wanted to highlight some essential parts of the DXpedition organisation that are not always obvious.

/DXpedition "Pilots"/

The □pilots□ are assigned, for Europe it's Col MM0NDX, for Australia and New Zealand it's Peter VK2NN, for Africa it's Andre V51B, for the Pacific region Stan KH6CG is doing the honours and last but not least we have Richard KY6R in Western USA.

For those who haven't come across Pilots before, they act as a conduit between amateurs trying to contact the DXpedition and the DXpedition leaders. The Pilot doesn't play God - but is a faithful "technical support agent" whose boss is the leader of the DXpedition.

The pilot may tell the DXpedition that he is receiving a lot of requests for a particular mode or band from a certain area of the world and if justified, the DXpedition may look at changing planned operations to fit this need as much as they can.

Pilots often have to put up with abuse from idiots. It's not an easy job! Pilots are volunteers and form another part of the DXpedition that is crucial to its success. All amateurs owe a vote of thanks to the pilots of this and all other DXpeditions for the work they kindly perform. So if you communicate with a DXpedition pilot, show them some respect □ remember they don't have to do this work!

Please refer to the web site ZL9HR.COM <http://www.zl9hr.com/> for the full, up to date, information about the major ZL9HR DXpedition to Campbell Island.

CY0 NEWS RELEASE - 2 October 2012

Ron, AA4VK and Murray, WA4DAN have announced a two week delay in the start of the CY0 DXpedition. The new dates are October 22 - 31. Unfortunately, circumstances beyond our control prevented us from being able to fly to Sable Island on October 8, our original schedule. The revised schedule, however, will put us on Sable Island during the CQWW Phone contest weekend and even though we do not plan to compete in the contest, we do plan to provide a new country, Sable Island, to those in the contest.

As previously advertised, focus will be on the 10, 12, and 15 meter bands where the most demand for CY0 exists.

WA4DAN/CY0 and AA4VK/CY0
CY0 NEWS RELEASE - 5 September 2012

"Planning continues for the October 8-17 DXpedition to Sable Island CY0. Half of our gear is in storage at the Maritime Air Charter facility in Halifax, Nova Scotia. We are in the process of shipping the remaining gear. We have booked our flights to Halifax. All remains on schedule for the CY0 operation to begin around 2300Z on October 8th. As always, weather and flying conditions will dictate the actual schedule. The aircraft has to land on the beach as there is no "runway" on the island.

This operation will be highly focused on 10,12 and 15 meters where the most demand for CY0 exists. We continue to discuss antenna options due to the restrictive environment we will be operating under.

Ron and Murray will begin loading the Britten-Norman aircraft late in the afternoon on October 7th. All gear must be weighed as we have a 1400-pound weight limitation, including our body weights. We will then watch the weather very closely. On Monday morning, October 8th, Maritime Air and the OIC on Sable have scheduled a 1200Z call to determine if a flight is GO/NO GO.

CY0 NEWS RELEASE - 12 August 2012

We are excited to announce that we have received approvals from "Parks Canada", "Canadian Coast Guard", and "Officer-in-Charge, Sable Island" to operate amateur radio from October 8 - 17, 2012.

We should note, however, that our permit to operate includes several new restrictions on antennas (in addition to the traditional restrictions for Sable). The purpose of these restrictions are to minimize the environmental impact on the migratory bird population

that may be present during the period that we are on Sable Island.

We feel fortunate to have received the trust of "Parks Canada" for this operation and consider it a privilege to be able to visit Sable Island. We will cooperate fully with these new restrictions to minimize potential environmental impact to the protected bird species.

In the days ahead, we will assess the impact that these additional antenna restrictions may have on our operations and any adjustments that we may need to take relative to antennas that we will take to Sable Island. Further details of our operating plans will be posted to CY0dxpedition,com.

This will be our third attempt to get to Sable island (previous attempts, December 2010 and December 2011)

I am always looking for new Qsl Manager routes/info. I also need to know about Qsl Manager/DX Station changes. If you know of a confirmed route that is either not in my data file or different than what I have, please send me the info ASAP so I can get my record up to date quickly.

The main purpose of the Golist data files is to assist you with the current active Qsl Manager info so that you do not waste your postage money on dead or bad routes.

Expected departure time

I've just been told that the Baltic Trader may depart tomorrow (4th October) at around 1200Z - earlier than the scheduled date of the 5th. I'll keep operating as long as possible, but it looks like tomorrow morning will be the latest unless this changes.

As a result, I'm going to concentrate purely on HF SSB - I know there were several of you looking for ZD9 both on 6m and RTTY, and I'd love to have activated both, but with this very limited amount of time, I need to concentrate on getting as many people in the log at least once as possible, so I'm very sorry to have to cancel these two. Another couple of days and it would have been possible!

Please note that tomorrow morning I will be concentrating on JA / VK / ZL on 20m from around 0600-0800Z.

Silent Key:

Michael Owen, VK3KI, president of the "Wireless Institute of
Australia" and president of the IARU-Region III passed away
on September 22nd.

The chairman of the "Ethiopian Amateur Radio Society" (EARS) Sid
T. May, ET3SID passed away on September 25. He was a founding
member of EARS in 1993.

On September 26, Goran Savic, YT2A, died in a plane crash in
Belgrad. As a Serbian Air Force Major he was on a routine training
mission when the accident happened. His colleague ejected from the

houses and people. He saved many lives.

Our condolences to their family and friends. We don't want to be sad

CY0 NEWS RELEASE - 2 October 2012

Ron, AA4VK and Murray, WA4DAN have announced a two week delay in the start of the CY0 DXpedition. The new dates are October 22 - 31. Unfortunately, circumstances beyond our control prevented us from being able to fly to Sable Island on October 8, our original schedule. The revised schedule, however, will put us on Sable Island during the CQWW Phone contest weekend and even though we do not plan to compete in the contest, we do plan to provide a new country, Sable Island, to those in the contest.

As previously advertised, focus will be on the 10, 12, and 15 meter bands where the most demand for CY0 exists.

WA4DAN/CY0 and AA4VK/CY0
CY0 NEWS RELEASE - 5 September 2012

"Planning continues for the October 8-17 DXpedition to Sable Island CY0. Half of our gear is in storage at the Maritime Air Charter facility in Halifax, Nova Scotia. We are in the process of shipping the remaining gear. We have booked our flights to Halifax. All remains on schedule for the CY0 operation to begin around 2300Z on October 8th. As always, weather and flying conditions will dictate the actual schedule. The aircraft has to land on the beach as there is no "runway" on the island.

This operation will be highly focused on 10,12 and 15 meters where the most demand for CY0 exists. We continue to discuss antenna options due to the restrictive environment we will be operating under.

Ron and Murray will begin loading the Britten-Norman aircraft late in the afternoon on October 7th. All gear must be weighed as we have a 1400-pound weight limitation, including our body weights. We will then watch the weather very closely. On Monday morning, October 8th, Maritime Air and the OIC on Sable have scheduled a 1200Z call to determine if a flight is GO/NO GO.

CY0 NEWS RELEASE - 12 August 2012

We are excited to announce that we have received approvals from "Parks Canada", "Canadian Coast Guard", and "Officer-in-Charge, Sable Island"

to operate amateur radio from October 8 - 17, 2012.

We should note, however, that our permit to operate includes several new restrictions on antennas (in addition to the traditional restrictions for Sable). The purpose of these restrictions are to minimize the environmental impact on the migratory bird population that may be present during the period that we are on Sable Island.

We feel fortunate to have received the trust of "Parks Canada" for this operation and consider it a privilege to be able to visit Sable Island. We will cooperate fully with these new restrictions to minimize potential environmental impact to the protected bird species.

In the days ahead, we will assess the impact that these additional antenna restrictions may have on our operations and any adjustments that we may need to take relative to antennas that we will take to Sable Island. Further details of our operating plans will be posted to CY0dxpedition,com.

This will be our third attempt to get to Sable island (previous attempts, December 2010 and December 2011)

BITS & PIECES -

8th ANNIVERSARY OF NAQCC -

This coming week of October 7 through the 13th is a very special one for the North American QRP CW Club (NAQCC). That week we celebrate the 8th anniversary of the founding of the club by Tom KB3LFC (now WY3H) - President, and John K3WWP - Vice-President. We will have 10 special event stations on the air that week - one from each USA call area - with the calls N1A, N2A, N3A, N4A, N5A, N6A, N7A, N8A, N9A, N0A. The 40 operators of the calls will post their operating schedule at http://naqcc.info/n3a_complete_schedule.php so you will know when and where to look for them as you participate in our celebration.

We are offering special QSL cards and Certificates for anyone who works one or more of our special event stations. To find out how you may obtain one and/or the other, check the information contained on the page at http://naqcc.info/main_n3a.html. You must follow the informatin there EXACTLY or your request may not be fulfilled.

The operation commences at 0000Z October 7 and continues through 2359Z October 13. That is the week of our monthly sprint with which many of you reading this may already be familiar. However this month's sprint is something special as all 10 of our special event calls will be active for the full two hours. There may be some sort of award or prize to the one working the most different calls. This should make our already extremely popular sprints even more popular than usual when we normally get 175-200 participants, of whom 110-130 or so will submit logs.

The sprint is Tuesday evening October 9 at 8:30-10:30 PM EDT which converts to the more familiar Wednesday October 10 from 0030-0230Z. Hope to see you there

as well as at other times during anniversary week.

CY0 NEWS RELEASE - 2 October 2012

Ron, AA4VK and Murray, WA4DAN have announced a two week delay in the start of the CY0 DXpedition. The new dates are October 22 - 31.

Unfortunately, circumstances beyond our control prevented us from being able to fly to Sable Island on October 8, our original schedule. The revised schedule, however, will put us on Sable Island during the CQWW Phone contest weekend and even though we do not plan to compete in the contest, we do plan to provide a new country, Sable Island, to those in the contest.

As previously advertised, focus will be on the 10, 12, and 15 meter bands where the most demand for CY0 exists.

3D2C ---> The DXpedition to Conway Reef went QRT earlier than expected, around 00.00 UTC on 3 October, after 71,693 QSOs. Their final log, statistics and OQRS are on http://www.yt1ad.info/3d2c/index.html. They expect to have QSL cards in the mail in late November and to "upload to LoTW within six months".

CQWW CONTEST DIRECTOR ---> CQ Contest Hall of Fame member and WPX Contest Director Randy Thompson, K5ZD has been named Director of the CQ World Wide DX Contest, effective immediately. He succeeds Bob Cox, K3EST, who retired in September after 35 years. Randy's appointment to the directorship of the CQWW creates a vacancy for director of the CQ WPX Contests. Anyone interested in taking on the challenge of leading a major contest should

contact Randy at k5zd[@]cqwpx.com.

DXCC NEWS ---> J5IFD (Guinea-Bissau, 2010 operation) has been approved for DXCC credit. [TNX NC1L]

HF STATION YOUTH GIVEAWAY ---> To encourage youth in DXing and contesting, the Amateur Radio Supplies owner management team (N1SNB and N0TG) will provide a complete HF station to a deserving young operator. Applicants are welcome from any location in the world provided they are 21 years of age or younger. Details on http://www.amateurradiosupplies.com/youth-s/222.htm

IARU NEWS ---> The Directors in IARU Region 3 have voted to appoint Peter Lake, ZL2AZ as the Chairman of IARU Region 3. He replaces Michael Owen, VK3KI, who passed away unexpectedly last month.

NWRW 2012 ---> The National Wildlife Refuge Week combines Amateur Radio communication capabilities with enjoyment of the outdoors to help others learn about the National Wildlife Refuge System. Amateur radio stations will be active from a number of wildlife refuges on 14-20 October under guidelines established in cooperation with the U.S. Fish & Wildlife Service. Information on this special event can be found at www.nwrweek-radio.info

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Luciano Lucini, IK2QPO (ik2qpo[@]425dxn.org).

ZD9UW ---> The "Baltic Trader" departed Tristan da Cunha earlier than the scheduled date of 5 October. Considering the limited amount of time, Rob M0VFC concentrated purely on HF SSB in order to get as many people in the log at least once as possible. He went QRT around 12.30 UTC on 4 October, with 4270 QSOs in the log from less than four days on the air.

11243. DX NEWS from QRZ DX

From: GOLIST

Hello DXers:

The 5U and TT8 operations are now finished. Hope you got a chance to work them.

A note from Jim, VQ9JC via Urb, W1UL this morning…..
“I'll be using another special prefix callsign, VQ92JC (nine two), from 20 Oct through 4 Nov. I'll be QRV in the 1200-1600Z time frame as much as possible during that calendar window. This is the sixth consecutive year that I've been issued a unique prefix.

The only drawback is that I'm still operating Field Day style from a recreational park. My station currently is an FT-857 at 100 watts to a dipole at a height of 10 meters.

I'll be on during the upcoming CQ WW SSB contest. I've made a lot of calls and CQs on SSB, both in and outside of contests, over the last several months, but very few ops have answered me. No doubt it's largely because prop condx aren't very good and because of my station limitations, so I don't know how good my SSB effort in the WW will be.

I'm scheduled to return to the States just after that. QSL via ND9M.”

So, listen up for Jim, he’s there trying, help him out.

A lot of reports coming in for operation during the upcoming CQWW SSB Contest October 27-28.
I’ll have the usual list of Announced Operations from Bill, NG3K the week before the contest.

Until next week, enjoy the chase, but HAVE FUN ! !

73,
Carl, N4AA

I was curious if anyone in this group has received QSL for Nov 2011 QSO with EF8S (via OH2BYS)?

I sent a card, envelope and IRC in December 2011 for our 80m QSO. I have made 2 attempts to contact OH2BYS via 2 different email addresses. It has been several weeks since my last email effort and still no reply and still no QSL.

OH2BYS seems quite active but my attempts to get a QSL have, to date, been unanswered.

Any insight would be appreciated. Thanks.

Emne: [GOLIST] EF8S (via OH2BYS) QSL??

I was curious if anyone in this group has received QSL for Nov 2011 QSO with EF8S (via OH2BYS)?

I sent a card, envelope and IRC in December 2011 for our 80m QSO. I have made 2 attempts to contact OH2BYS via 2 different email addresses. It has been several weeks since my last email effort and still no reply and still no QSL.

OH2BYS seems quite active but my attempts to get a QSL have, to date, been unanswered.

Any insight would be appreciated. Thanks.

BITS & PIECES -

GB2BP BLETCHLEY PARK -
On the 1st January, 2013, the eighteen year association of the Milton Keynes Amateur Radio Society (MKARS) and Bletchley Park will finally come to an end due to MKARS having to vacate their current clubhouse. The main reasons for Bletchley Park serving notice on MKARS are due to: The building currently occupied by MKARS is required to make way for the creation of a new park entrance and an access road to the coach park. With no additional space that MKARS could occupy, it has been deemed that the Milton Keynes Amateur Radio Society will not fit into the future World War II profile of the Bletchley Park Museum.
By representing the voice of both Amateur Radio and Bletchley Park to the world, the call sign GB2BP has made friends in many countries for the Milton Keynes Amateur Radio Society and created interest in the amazing work that was carried out within Bletchley Park during WWII. Although GB2BP will not be in residence at Bletchley Park after the 1st January 2013, it will re-appear occasionally as a special event station supporting public events on Bletchley

Park.
Further details will become available on the MKARS website, just visit
http://www.mkars.org.uk/ [RAFARS]

VK0BP - SK
Many operators will remember working Bob, VK2ABP as VK0BP (or AX0VB) from
Davis Station, Antarctica throughout 2009.
Sadly, it has been reported that Bob passed away suddenly at the age of 36
on Sunday, October 14th 2012.

30 METER WEEKEND ---> Celebrating the 30 Meter Digital Group's 5th anniversary, the 30 Meter Multi Mode Weekend will run on 27-28 October. This is not a contest, but an event to "promote awareness" of the 30m band. Complete information can be found at http://www.30mdg.net/news.html [TNX KB9UMT]

BANABA 2013 ---> The March 2013 T33A DXpedition to Banaba [425DXN 1116] has been cancelled owing to logistic problems.

CLIPPERTON 2013 ---> The March 2013 DXpedition to Clipperton Island has received the callsign TX5K to be used during the operation; the QSL manager will be N2OO. The DXpedition will be active on all HF bands and modes for about 10 days. One space remains available for another operator, scientist, or other supporter who wishes to join the DXpedition. You can see the current team, along with a complete description of the project, on the DXpedition website (www.cordell.org/CI/). If interested in joining the team, please contact Bob, KK6EK (kk6ek[@]cordell.org) or Chris, DL1MGB (chris[@]dl1mgb).

+ SILENT KEYS + Bob Paton, VK2ABP passed away on 14 October at only 36 years of age. Back in 2008-09 he spent twelve months at Davis Station, Antarctica, and was QRV as VK0BP and AX0BP.

11292. SPECIAL BULLETIN FROM QRZ DX

Yahoo group: GOLIST (2011 — 2012)
Date: 2012-10-22 15:19:47 UTC
From: K1XN
Topic: 11292 Message: 11292

Hello DXers:

A special bulletin this morning on the CY0 DXpedition.

Murray, WA4DAN posted the following on Sunday afternoon and followed up later ……

“Murray, WA4DAN and Ron, AA4VK announce that everything is set for their operation from Sable Island beginning October 22-31. The weather forecast for Monday looks good, at this time. The only concern is the beach conditions. Rain is forecast for Sunday which could potentially affect the "beach runway".
Travel to Sable Island is always problematic. Often, when conditions in Halifax are good, conditions at Sable Island are not good and visa versa. Also, the "old" Britten-Norman Islander aircraft is not equipped with modern instrumentation, which limits the conditions under which it is safe to fly between the mainland of Nova Scotia and Sable Island. We were unsuccessful in two previous attempts to visit Sable Island. We are optimistic that Monday will be a "GO".

As previously advertised, our focus will be on 10, 12, and 15 meters, where the demand for CY0 is greatest, and especially on 10M, where new DX'ers, with modest stations, have the best opportunity to work "a new one". Also, we plan to be active in the upcoming CQWW Phone contest on 10, 15, 20, and 40 meters to provide CY0.

We would like to thank Gerry Forbes, Officer-in-Charge for Sable Island for being so helpful in trying to make this, our third attempt, successful. In addition, we would like to express our appreciation to Gary, VE1RGB, who has provided invaluable logistical support in Halifax, Nova Scotia, the departure point for the flight to Sable Island.

Monitorwww.cy0dxpedition.com for the latest updates.”

The followup:
“I arrived in Halifax, Nova Scotia this afternoon. Ron and I were met by Gary, VE1RGB, who has provided fantastic logistical support for the CY0 DXpedition. We drove over to Gary's house and picked up an additional antenna mast.

The weather forecast for Monday still looks good. Our flight to Sable is scheduled for approximately 1700Z. We were originally scheduled for an earlier flight but a pressing need for the aircraft has delayed our departure by about three hours. Ron and I will do a final inventory and start on antenna construction Monday morning at the Maritime Air facility.

Checkwww.cy0dxpedition.com for the latest updates. This will be the final update I can send unless our flight is delayed.

Thanks and 73,
Murray WA4DAN”

GL/73,
Carl, N4AA

From 9-17 November 2012 look for 3A/ON5UR and 3A/ON8AK running SSB only. So far they have permission for one base station, but hope to find a solution to get two stations on the air. They will operate from 80-10 metres. QSL via M0URX (OQRS). Webpage to follow. [DX World]

10/11/2012: Eric, F6ICX, will once again be active as 5R8IC between 10 November until 9 December 2012 from Nosy Boraha [aka Ile Sainte-Marie] (AF-090, WLOTA 0491). Robert may also operate from unihabited islands around Green Turtle Cay using a low power transmitter (Yaesu 817nd) and wire antennas. Likely this will be on the 20m band. All cards will be returned with a photo QSL from the island upon his return. Please send them direct to his home call AK4BM. SASE/Green Stamps appreciated, but not required. [DX World]

11327. CQWW 2012 SSB Contest

Hello DXers:

The CQWW SSB contest this weekend should be interesting. With the improved solar numbers and reports of lots of activity on 10 meters, we could really have fun this time.

I happened to see a report this morning on probably the shortest call for the contest ☐ E 2 E.
Not that difficult for a voice contest, but it could be tricky on CW ! !

I☐ll be sending the list of ANNOUNCED OPERATIONS by Bill, NG3K late tomorrow. Hopefully you will find it useful during and/or after the contest.

A few items came in too late to get them in QRZ DX so here they are:

RW6HS reports:
☐The Federation of Radio Sports of Azerbaijan and ☐Safari☐ DX-activators Club are organizing an expedition to Karabakh area at the period 25-28 Oct 2012. The DX-pedition will operate as 4K3K and 4J0K using, most probably, two shacks.

Please, take into account that the mentioned callsigns are the only legal signals assigned for Karabakh area, issued by Ministry of Communications of Azerbaijan. Any other callsigns have to be considered illegal.

Please, take into account that the QSL-manager for both calls is RW6HS. ☐

Harry, AC8G reports:
☐Grenada - J3 -- Terry KS5Z and Mike K5KM will operate as J38T in the CW WW SSB contest. QSL route not advised but J38T is assigned to KS5Z. J38K will be on 12 & 17 Meters a day or so before contest. Again QSL route not given but J38K is K5KM. They will leave for home early Monday morning.☐

POSTAL RATES:
Mal, VK6LC reported:
☐The Australia Post QSL card rate went up October 22nd.
It cost now to send a QSL card direct is $1.65; that is a 5-cent increase.
1 US dollar = 0.9690 Australian dollars
$1.65 Aus = $1.70USD.
$2USD will still cover QSL Card rate to from VK-USA.☐

Enjoy chasing DX and the contest, but HAVE FUN ! !

73,
Carl, N4AA

It is recommended that you close your GoWin program before installing the new data file. This just helps˜ prevent any errors from happening.

UPDATE -
==========
ANTARCTICA -

RI1ANF/P is quite often active from the Russian Priroda Refuge (WAP RUS-15), not too far away Bellingshausen Base, on South Shetlands. On his previous visits to Priroda Refuge (last Oct. 21-22 and Oct. 25 through 28) Oleg made over 1200 QSOs operating as RI1ANF/P. He will try to activate Priroda Refuge again till the first week of November, so - stay tuned! QSL via RK1PWA.

Oleg Neruchev, ZS1OIN (UA3HK), will replace Oleg Sakharov as new Chief of Bellingshausen Base (WAP RUS-01) and will be QRV on all bands, mostly CW, after February 12th as RI1ANU instead of the normally used RI1ANF callsign.

More info about Antarctica on WAP website (www.waponline.it). [I1HYW]

D2HD, Sergey, has selected Buzz, NI5DX, as his QSL manager. A card must be designed and printed. Please allow 4-6 weeks for the cards to arrive from the printer.

Sergey will provide Buzz with the log every week, so there will be very little wait for the cards to be processed and mailed.

*I am working on getting a Second order up for the RAC Winter 2013 call book cd. It will go into production next week and start shipping late November 2012. My first order is sold out and I have had several requests for the cd.

I learned from the factory yesterday that this edition also includes a FREE memory stick (not to be sold separately) From what I was told, I believe that the call book program is also loaded onto this USB memory stick. This is a nice perk for my customers.

If you or a friend are interested in this edition of RAC, please goto the GoShop order page and place your order. This is a PayPal shopping cart and requires a PayPal payment to complete the order. Please put you call sign in the shipping instructions to the Seller, this keeps me from making a shipping mistake.

If I can get enough cds sold quickly, I possibly can get them in this production run.

Logbook of The World Experiencing Maintenance Issues -
11/07/2012
ARRL Information Technology Manager Michael Keane, K1MK, is reporting that the Logbook of The World (LoTW) system is currently down for maintenance. "With the system temporarily down, radio amateurs are not able to access LoTW or upload their logs," Keane explained. "No data has been lost, and everyone's records are intact. We understand the problem and we are in the process of restoring service to LoTW, but we don't know when that will happen. Since both the Logbook of The World service and the Online DXCC service are connected to the ARRL Awards System, radio amateurs are not able to access either service until the system is restored. We apologize for any inconvenience this may cause, and want to assure the amateur community that the ARRL is working diligently to restore service to these popular programs."
UPDATE: Logbook of The World Expected to Be Back Online on November 9 [The ARRL Letter]

/One of the most important DX'peditions of the year is about to start./

ZL9HR will be active from the UNESCO World Heritage Campbell Island which is 650Km south of New Zealand in the Great Southern Ocean. I am glad to report all plans are still on schedule and ZL9HR will be active on all bands from 160m to 6m from November 28th to December 9th from Campbell Island. Here's hoping for mild weather and good propagation for the event.

As always please refer to the DX'Pedition's website zl9hr.com/ for all details and latest updates.

IRCS TO BE DISCONTINUED IN THE U.S.? It seems that the United States Postal Service (USPS) will (or try to) follow what the U.K. is going to do with IRCs. The USPS has proposed to discontinue the sale of International Reply Coupons (IRCs) due to the "low quantity demand by customers" but will "continue to exchange (redeem) international reply coupons purchased in foreign countries and presented at U.S. Post Office facilities". You can read more in the Federal Register at: https://www.federalregister.gov/articles/2012/10/23/2012-25992/international-mailing-services-proposed-product-and-price-changes#h-13

Comments on this proposed change will be accepted through November 23rd, and can be voiced/filed at: http://www.regulations.gov/#!submitComment;D=USPS-2012-0101-0001
It has been suggested that the amateur radio operators should try to make a the case for retaining IRCs on the <usps.com> store only. IRCs are currently available at <usps.com> so there is no need to have them stocked or ordered at a local post office. It costs literally nothing to have them in the online store. If the sale of IRCs are discontinued here in the U.S., you will have to buy them from another country.

I am one of a few newly licensed hams here on our beautiful island of Mauritius. My 'Elmer' is well-known: he is my OM, Rachid / 3B8FQ, whom you may have also worked over the years. Currently you may find me active almost daily on 28.491 MHz SSB, at 14:00Z, as HF propagation allows. I also plan to be QRV on CW in the future. If you hear me on any mode, please spot 3B8BAE on the DX PacketCluster system, and of course, give me a call. I enjoy meeting new friends!

**QSL Info: */There is _No QSL Bureau_ for Mauritius. /My QSL Manager is Ron, K5XK -- who also handles cards for my Dad, 3B8FQ. Please QSL Direct to K5XK with /2 USD, preferred,/ although IRCs are also OK. See www.qrz.com/db/k5xk <http://www.qrz.com/db/k5xk>for more info. Unfortunately, there is also /n//o LoTW and no e-QSL at this time, sorry./*

*A new data file has been uploaded to the Golist download page. This is the NOVEMBER 1211-B**data file. Use the Download button in your GoWin program for quick access to the download page. The link is˜ http://golist.net/dlauth.cfm

It is recommended that you close your GoWin program before installing the new data file. This just helps˜ prevent any errors from happening.

11414. Qsl information Update from VU2PAI

Greetings from Mangalore ,South India,
With a heavy heart i wish to inform the sad news about the loss my beloved father recently. He encouraged me very much in all walks of life and specially he helped me and motivated a lot for Ham Radio. The reason for my mail is to request you to publish some information that i will give in this mail in your next news bulletin.

I have a small back log of the qsl's that i have received recently from about june-august as i was travelling to the u.s in May-June to attend Dayton Hamfest and i have not been active on the air for about 2 months since the death of my father. I am now QRV and i will be sending all the pending cards soon. I once again request all dx hams not to send any green stamps with their qsl card. Irc's are fine no problem at all. I also read that it is difficult to get irc's in many post office's in Europe and now the U.S.A also.But please do not forget to send a self addressed envelope or a address label with your qsl request.(More info on QRZ.COM <http://QRZ.COM> under my call VU2PAI) I will be very happy to send cards via direct even without irc or green stamp, no problem, I request hams to please use 3 or 4 beautiful stamps on the envelope when they send me their card. If possible they can send me 3 or 4 mint (unused stamps) from their country or any saved envelopes that they have from exchanging qsl's from other dx contacts to me. I love collecting stamps and stamps on envelopes. I still have some photo qsl cards from my previous activations like St.Marys Island (IOTA AS-096), Sacrifice Rock Island (Iota AS-161), AT0PAI,AT2PAI,VU2PAI/50 etc.

I DO NOT have any qsl manager and i handle all my qsl requests. Some databases showed a qsl manager in Italy for me which is wrong information.

All qsl cards only for VU7LD/VU2PAI (Laccadive Islands) is VIA W3HNK ONLY.

I have also been appointed as the QSL manager for ALL VU stations since the last one year and i will be happy to forward all incoming qsl cards to the members of the ARSI (Amateur Radio Society Of India which is affiliated to the IARU).

Best wishes to all and Seasons greetings in Advance for a very Merry Christmas and happy,healthy and a prosperous 2013.

Tara Expeditions has been organizing missions aboard the research schooner Tara for the past 9 years. The goal was to learn more about the impact of climate change on ecosystems.

Tara has accomplished 8 successful expeditions – to Greenland, Antarctica, Patagonia, southern Georgia, the Arctic and all over the world with the latest expedition Tara Oceans. After stopovers in Europe this winter, the schooner will leave for a new mission in 2013 for the great North.Tara will attempt to go through the Arctic Ocean by the northwest and northeast passages, if the ice pack permits this.

This will also be the occasion to add new research programs specific to the region, concerning plastic particles and traces of pollution.**********

PT0S ---> The team was aiming to remain QRV for the CQWW contest, but they were not permitted to stay during the weekend and PT0S went QRT at 10.30 UTC on 23 November. "Most of our plans went out the window the day we landed", the team reported on the 20th. "We had to improvise because things have changed since our July survey trip. We ended up with a totally different basing, antenna and operating plan". Read about the trials and tribulations the team had to endure at http://pt0s.com/. Log updates were very difficult to send. The latest, but not final update on Club Log (22 November at 08.45 UTC) includes 40922 QSOs (23649 CW, 15676 SSB, 1597 RTTY) with 13116 unique calls. Logs are sent to LoTW at the same time as they go to the online logsearch, but there is several days of delay at ARRL processing the files. The OQRS for both direct and bureau cards is now up and running on the DXpedition's website.

QSL 4L1AN ---> As of 21 November, Buzz NI5DX, is the QSL manager for Joni 4L1AN. They will work on designing a card and getting it printed. This may take up to 6 weeks. NI5DX will not be able to answer any card requests prior to 21 November 2012. [TNX The Golist]

QSL ZL2HAM ---> Effective immediately, Buzz NI5DX, is the QSL manager for Rick ZL2HAM (including his contest callsigns ZL1G and ZM1G).Rick has forwarded his past logs, so Buzz will be able to answer any request for a card. The QSL cards should be available to send out in about a month. [TNX

The Golist]

V26B ---> Team Antigua is saddened to announce that the V26B contest station was totally destroyed by fire on 18 November. Luckily, no one was seriously hurt. The station Owner, Roy V21N, received minor injuries due to smoke inhalation but is OK now. As of now, the future of the station is uncertain. It may be possible to rebuild it, as the antennas and towers were not damaged. However the interior and all equipment, tools and spare parts were totally destroyed. Pictures of the fire can be found at http://n3oc.dyndns.org/v26b/
Also, Mike KA2AEV (QSL manager for V26B) reports that he has not "yet begun to answer any QSL requests that I have received". He does not anticipate being able to do so for "maybe another two weeks" because of his current work commitments ("Hurricane Sandy hit my area hard", he says, and "I work for the local Power Company").

VP8SGK ---> Mike, GM0HCQ (VP8CMH/mm) was able to operate as VP8SGK from King Edward Point, South Georgia on 20 November, from about 17.30 UTC until about 19 UTC. He was QRV on 10, 17 and 20 metres SSB. QSL direct to GM0HCQ (Mike Gloistein, 27 Stormont Way, Scone, Perthshire PH2 6SP, United Kingdom).

+ SILENT KEYS + Rod Newkirk, W9BRD/VA3ZBB passed away on 19 November. The editor of QST Magazine's "How's DX?" column from 1947 to 1978, he was inducted into both the CQ DX Hall of Fame (1984) and the CQ Hall of Fame (2002). He was credited with coining the term "Elmer" (meaning someone who provides personal guidance and assistance to would-be hams) back in 1971. [TNX ARRL]

QSLs received direct or through managers: 1A0C, 3A/G0VJG, 3D2C, 4L1MA, 5B/W2TAA, 5B4AII, 5C13IG, 5C13KD, 5C13YR, 5U5U, 5U6E,5U8NK, 6O3A, 7O6T, 8P6DR, 8Q7OE, 9M8DX, 9Y4D, 9Y4W, A5A, A71CV, BD1BYV, C4M, C50C, C5A, CO2QU, CY9M, D3AA, D64K, E21EJC, E51AND (OC-124), EA6UN, ER1LW, EX8MLE, EY0A, FG5FR, IP1T (EU-083), J28AA, J28NC, J39BS, JA1NLX/VK4 (OC-160), JT1E, JY4CI, KG4WV, KH8/DL3DXX, KH8/N7CQQ, NH0J, OD5PY, OG3077F, OX3LX, OY1CT, P3N, PJ6/G4IUF, PJ7DX, RI1FJ, T6JC, T6JP, T6LG, T77C, TF3W, TK9R, TO2D, TO6T, TO7BC, TT8PK, TT8TT, VK9XM, VP5DX, VP8CFV, VP9I, VU7M, XE1L/XF3 (NA-183),XE2HQI, Z81D,ZA/OK6DJ, ZD8O, ZS6NK,ZS7/DL1LLL, ZW364PA.

Post Office Wants to Phase Out IRCs - Files notice in Federal Register of intent to stop selling International Reply Coupons (IRCs) as of January 27, 2013. Post offices would still be required to redeem IRCs sent from other countries.

Do any of your postal people know the full scoop on this?

Topic: 11444 Message: 11444

I received my orders from RAC yesterday afternoon.
I got the CDs and the Thumb Drives that are to be included in the CD package.

This Thumb Drive has the call book loaded on to it. It is just like the CD. This is a very nice and useful gift from RAC, as it is FREE with the purchase of the RAC CD.

I have about 015 call book cds w/Thumb Drives left in my inventory. They will not last long.

Go to my web order page for pricing and placing an order.

ARRL 10 METER CONTEST ---> Object of the contest is for amateurs around the world to work as many stations as possible on the 10m band. This year's event will be held on 8-9 December. Complete details can be found at http://www.arrl.org/10-meter

PT0S ---> "The logs of the last 20 hours of operation were uploaded", the team reported on 27 November. "Please note that these logs do not contain corrections. We will deal with the correction requests during the next two weeks and upload a final and corrected log around 10 December. (Probably not so final, as correction requests are likely to be coming in for a while.)"

QSL NH8S ---> "Our QSL manager (Joe, AA4NN) has processed all QSL requests from OQRS and direct mail. Envelopes and QSO labels are prepared for the QSL cards. The cards were shipped from Italy and we await their arrival. As soon as they arrive, all cards will be mailed. LOTW confirmations have been uploaded for those that have donated more than $10 to the DXpedition. Remaining QSOs will be uploaded in batches starting December 1st". [TNX W8GEX]

QSL OY3JE ---> Tim, M0URX has taken over QSL duties for OY3JE. He has already received a parcel from Jan containing 115 letters, which have been processed through the log. QSL cards will be posted once the cards arrive from the printer very soon.

ZL9HR ---> The operation was originally scheduled to be QRV from 28 November. The sailing vessel "Evohe" with the ZL9HR team departed Bluff, on the southern coast of New Zealand's South Island, on the 26th around noon local time. However, bad weather forced the team to shelter in the lee of Stewart Island and wait for conditions to improve. They expected to leave for Campbell Island on 29 November in the morning and hopefully to reach their destination on 1 December. MM0NDX, the EU Pilot station, reports that they will not be able to extend their stay on the island beyond 9 December. Keep an eye on http://dx-world.net/

Hi all after a crazy week and weekend of packing,getting my licnece
and moving to Apia, Samoa, i have finally arrived
the good news is that i have my latest and permanant callsign 5W0W.
after alot of to and fro with suffixes "RK" and "KR"

So all is good that ends well, so they say, so 5W0W it is and have now
set up qrz.com <http://qrz.com/> for that.
For those of you who made a contact with me on sunday's ANZA DX net as
5W0KR....well it is a valid one, but if you need a QSL card, i will
have to disappoint, but i am sure we will make many more contacts with
this final call.
thanks to you all for your understanding

best 73

3 December 2012

FOR IMMEDIATE RELEASE

After a lot of negotiation we are pleased to announce a multinational team of twelve is to undertake a Dxpedition to Bouvet Island from 25 March 2013 to 5 April 2013 using the callsign 3Y0IOF.

We will be operating 24/7 with five stations covering all bands 160m-10m.

We understand that Dxpeditions are all about you the DX operator therefore we are pleased to announce some exciting new innovations.

We appreciate many of you feel you should not have to make any effort to work us. Accordingly we are offering you the chance to call us on the telephone when you are ready for a QSO. That’s right we will give you a phone number and when you are ready you can ring us and we will immediately cease to work the pile up and call you on a frequency of your choice. Not only that we will also ensure an email is sent to you directly after the QSO to confirm you are in the log. Furthermore we are organising a team of experts who, if you wish, will fly in and set up your rig on the required frequency, connect the antenna for you and make sure the heating or ventilation is on so it is nice and warm or cool in your shack as the case requires. Don’t worry about propagation. We will make sure there is some between us as we understand that is our responsibility and it’s our fault if there isn’t.

If that is not for you then don’t worry we are just as happy to work you in a pile up. We realise that we will need to operate in accordance with your operating habits so therefore we will understand if you call over the top of another station we are trying to work, or when we are specifically calling a part of the world you do not reside in, or if you are simply calling aimlessly or while we are transmitting, or even if you call when you cannot hear us. We will do our best to work you despite all this and yes we know it’s our fault if you do not make it into the log.

We wish to acknowledge the value Frequency Cops bring to a Dxpedition so to recognise this we are going to specifically publicise some times when we will arrange for some operators to deliberately call us on our frequency instead of split. Frequency Cops can even register their availability with us to help us ensure these periods get maximum uptake by the Frequency Cop community. During these periods the Frequency Cops will be able to say or send “up up!” to their hearts content. (Note: we will make sure we tell the pile up to listen up and not down as the recent PT0S Dxpedition has taught us that Frequency Cops don’t know how to send “down” in CW).

We also don’t want the “tuner uppers” to feel left out and like them we feel dummy loads are completely overrated. So when we are ready to transmit on a band we will give them the opportunity to tune up on our frequency before we start working the pile up. Each period will start with us sending our callsign and “QDL” (“Quick Dummy Loaders”) so they will know when to commence tuning up on us. We will allow for at least five minutes for this as we know how important it is for the tuner uppers to make sure their finals are good and ready. We acknowledge if they go bang it’s our fault. Depending on demand we will every now and then send “QDL” while working a pile up so any tuner uppers late to the party can tune up on us as well.

Unfortunately we will not have cluster access while we are on Bouvet but we know this will not stop you posting announcements and comments on the cluster about our Dxpedition. Some suggestions for you to try include saying what band you want us to QSY to or mode to operate on, the quality of our ops and the usual “loud”, “can’t hear them here”, “thanks for 7th band” or “yee hah” comments. Likewise as we noted above we understand it’s our fault if you cannot work us and therefore we accept in that case you will post on the cluster calling us the worst Dxpedition ever.

We can’t wait to be of service to you.

CALL SIGN CHANGE - 5W0W
Hi all after a crazy week and weekend of packing, getting my licnece and moving to Apia, Samoa, I have finally arrived the good news is that I have my latest and permanant callsign 5W0W. After alot of to and fro with suffixes "RK" and "KR".

So all is good that ends well, so they say, so 5W0W it is and have now set up qrz.com <http://qrz.com/> for that. For those of you who made a contact with me on Sunday's ANZA DX net as 5W0KR....well it is a valid one, but if you need a QSL card, I will have to disappoint, but I am sure we will make many more contacts with this final call. Thanks to you all for your understanding.

QRZ and HRD to make Joint Announcement at Orlando Hamcation

With a successful beta-test of the pre-release version of Ham Radio Deluxe 6.0 <http://www.ham-radio-deluxe.com>well underway, plans are on target for a production release roll-out at Hamcation 2013 <http://www.hamcation.com>, Feburary 8, 9, and 10th.

The initial customer feedback from the beta test program has been extremely positive. User are raving over the new Cluster and Awards design in HRD Logbook as well as label printing. This interface was designed by Mike Carper, WA9PIE who says: "I designed the new Worked Status Indicators and awards reports in Logbook to be the most powerful asset available for DXers and awards hunters. Worked Status Indicators in logbook now show you worked and confirmation status of countries for both band and mode. LOTW and eQSL participants are now indicated in the cluster. We now track almost 200 unique awards and 100 endorsements in fifteen of the most popular awards programs. When completed, I found that I qualify for eight awards and ten endorsements that I was unaware of previously"

For additional information about Ham Radio Deluxe 6.0 as well as their great support forums, please go to http://www.ham-radio-deluxe.com

This year, HRD will have its own double booth at Hamcation and QRZ will be there to help cheer on this new release, plus, a few surprises of its own. Fred Lloyd, AA7BQ, will be speaking at the event and will discuss several new QRZ developments. Be sure and catch him and the Zed as they will be passing out the new QRZ Bumper Sticker to everyone who stops by to say hello.

For those who aren't aware, Hamcation is the premier winter hamfest in the country. Now in its 67th year, Hamcation has always enjoyed its Orlando location which is famous for its nice weather this time of year. The grounds are superbly matched for this type of activity with lots of camping space, lots of inside and outside booth space, and a turnout that is exceptional. The friendly Orlando Amateur Radio Club (OARC) is also to be commended for their expert management of the event along with an incredible track record of service to our community.

Come join us for this exciting event. We'll look forward to
meeting you there.

DXCC NEWS ---> Both 5T0SP (Maurotania 2012) and ZL9HR (Auckland & Campbell
Islands 2012) have been approved for DXCC credit.

DXPEDITION OF THE YEAR POLL ---> The DX World.net 2012 DXpedition of the Year poll is now open at http://dx-world.net/. "This was an incredibly difficult poll to decide on considering so many notable expeditions took place during the last 12 months. It's conceivable that up to 40 different DXpeditons could have been nominated, however, a short-list of 26 made the poll. In previous years the poll was limited to three or five votes. This year we have decided to allow 'free' votes on as many DXpeditions you wish to select. In addition, to prevent repeat votes, an account must be created using your callsign and QRZ.com listed email address. Once created you will receive an email then you are ready to vote". The poll closes on 15 January 2013 - cast your votes! [TNX MM0NDX and IK8LOV]

IOTA NEWS ---> Updates for the Honour Roll and other annual listings must be sent on or before 31 January. IOTA rules limit inclusion in the listings to those participants who have updated their scores at least once in the preceding five years and have opted to have their scores published. Listing in the 2013 tables will be restricted to those participants who have updated their scores since February 2008.
The following operations (February-November 2012) have provided acceptable validation material and are therefore approved for IOTA credit:

EU-040 CR5WFF OC-124 E51AND SA-087 LT0X
The 7O6T (AF-028) operation, which has been accepted for DXCC, is also approved.
The list includes operations where validation material was specifically required for credit to be given, as well as operations where validation material was volunteered. In all cases, cards submitted will be accepted by Checkpoints if they meet normal standards (i.e. the island name should be printed on the card). [TNX G3KMA]

POSTAL RATES (ITALY) ---> Italian postal rates for standard letter items (up to 20g) mailed abroad will increase on 1 January:
0.85 EUR Europe and countries in the Mediterranean basin (3V, 4X, 5A, 5B, 7X, CN, JY, OD, SU, YK)
2.00 EUR rest of Africa and Asia, Americas
2.50 EUR Oceania

POSTAL RATES (USA) ---> Effective 27 January 2013 the U.S. Postal Service (www.usps.com) will implement another postage rate increase. The rate for First-Class Mail letters up to 1 oz (28 grams) to all international destinations will be 1.10 USD.

QSL XR0Y ---> Tim, M0URX has taken over QSL duties for XR0Y (Easter Island 2009). OQRS is now open for direct requests - "as I only have a few XR0Y QSL cards", Tim says, "these will be for direct only! No bureau cards available here until a reprint has been done".
